1. Introduction

Thank you for choosing the Hurom H-AA Cold Press Juicer Machine. This manual provides essential information for the safe and efficient use of your new juicer. The H-AA model is designed for optimal juice extraction, preserving natural nutrients and flavor through its patented Slow Squeeze Technology. It features a streamlined design and offers versatility for various ingredients.

2. Important Safety Information

Please read all instructions carefully before operating the appliance. Failure to follow these instructions may result in electric shock, fire, or serious injury.

- Always unplug the juicer from the power outlet before assembling, disassembling, or cleaning.
- Do not immerse the motor base in water or any other liquid.
- Keep hands and utensils out of the feed chute during operation to prevent injury. Use the provided pusher only.
- Ensure all parts are correctly assembled before turning on the juicer.

- Do not operate the juicer if the power cord or plug is damaged.
- This appliance is for household use only. Do not use outdoors.
- Keep the appliance out of reach of children.

3. Product Overview and Components

The Hurom H-AA juicer consists of several key components designed for efficient and quiet operation. Familiarize yourself with each part before assembly.

Other Juicers

Shreds fruit and vegetables

Less nutrients, more oxidation

Damages ingredients

Watery, pale juice

Complicated, expensive maintenance

HUROM

Revolutionary juice extraction

More nutrients, minimal oxidation

Preserves flavor and nutrition

Vibrant, full flavored

Simple, easy, economical

Included Components:

- Body (Motor Base)
- Hopper
- Hopper Lid
- Auger
- Bowl
- Fine Juice Strainer
- Coarse Strainer
- Ice Cream Strainer
- Juice Container
- Pulp Container
- Tofu Press
- Pusher
- Drying Rack
- Large Cleaning Brush
- Small Cleaning Brush
- Manual and Recipe Book

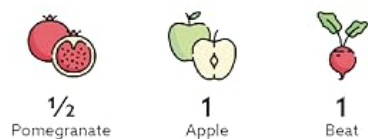

4. Setup and Assembly

Before first use, wash all removable parts with warm, soapy water. Ensure all parts are completely dry before assembly.

1. Place the Motor Base on a stable, flat surface.
2. Align the Juicing Bowl with the motor base and rotate until it locks securely into place.
3. Insert the Fine or Coarse Strainer into the Juicing Bowl, ensuring it sits flush.
4. Place the Auger inside the strainer, twisting it gently until it drops into position.
5. Attach the Hopper onto the Juicing Bowl, aligning the red dots, and rotate clockwise until it clicks into place.
6. Place the Hopper Lid on top of the Hopper.
7. Position the Juice Container and Pulp Container under their respective spouts.

Recipes to Try

Pomegranate Apple Beat

Blueberry Smoothie

Tomato Grape

5. Operation

The Hurom H-AA is designed for simple and effective juicing. Follow these steps for optimal results:

1. **Prepare Ingredients:** Wash fruits and vegetables thoroughly. For harder items like carrots or beets, cut them into smaller pieces (approximately 1-2 inches) to prevent strain on the motor. Remove large seeds or pits from fruits.
2. **Power On:** Plug the juicer into a grounded electrical outlet. Flip the 'ON' switch to start the motor.
3. **Feed Ingredients:** Slowly feed ingredients into the hopper. Do not force large quantities at once. Allow the auger to process the ingredients at its own pace. Use the pusher only if necessary to guide ingredients down.
4. **Pulp Control:** Use the pulp control lever on the juicing bowl to adjust the amount of pulp in your juice. Close it for less pulp, open it for more.
5. **Juice Collection:** Fresh juice will flow into the juice container, and pulp will be expelled into the pulp container.
6. **Reverse Function:** If ingredients become jammed, switch the power to 'REV' (Reverse) for a few seconds to clear the blockage, then switch back to 'ON'.
7. **Finish Juicing:** Once all ingredients are processed, allow the juicer to run for a few more seconds to extract any remaining juice. Turn off the juicer and unplug it.

6. Maintenance and Cleaning

Regular cleaning ensures the longevity and optimal performance of your Hurom H-AA juicer. All removable parts are designed for easy hand washing.

1. **Disassemble:** After unplugging the juicer, disassemble all removable parts in reverse order of assembly.
2. **Rinse:** Rinse all parts under running water to remove large pulp residues.
3. **Clean with Brushes:** Use the provided large and small cleaning brushes to thoroughly clean the strainers and other components. Pay special attention to the fine mesh of the strainers to prevent clogging.
4. **Wash:** Wash all removable parts with warm, soapy water.
5. **Dry:** Air dry all components on the drying rack or wipe them dry with a clean cloth before reassembling or storing.
6. **Motor Base:** Wipe the motor base with a damp cloth. Never immerse it in water.

Product Care Instructions: Hand Wash Only.

7. Troubleshooting

If you encounter issues with your Hurom H-AA juicer, refer to the following common problems and solutions:

- **Juicer does not turn on:** Ensure the power cord is securely plugged in and all components are correctly assembled and locked into place. The juicer has safety features that prevent operation if parts are not aligned.
- **Motor stops during operation or jams:** This usually indicates an overload. Switch the juicer to 'REV' (Reverse) for a few seconds to clear the blockage, then switch back to 'ON'. If the issue persists, disassemble and clean the parts, then reassemble. Cut ingredients into smaller pieces.

- **Excessive pulp in juice:** Ensure you are using the fine strainer for less pulp. Adjust the pulp control lever to the desired setting.
- **Low juice yield:** Ensure ingredients are fresh. For fibrous vegetables, cut them into smaller pieces. The slow squeeze technology is designed for high yield, but very dry or old produce may yield less juice.
- **Loud noise or vibration:** Check that all parts are correctly assembled and securely locked. Ensure the juicer is on a stable, flat surface.

If problems persist after attempting these solutions, please contact Hurom customer support.

8. Specifications

Feature	Detail
Brand	Hurom
Model Number	H-AA-LBB17
Color	Rose Gold
Product Dimensions	7.1"D x 16"W x 7.1"H
Material	Plastic (Ultem Blade)
Item Weight	10.6 pounds
Maximum Power	150 watts
Voltage	120 volts
Number of Speeds	1
Capacity	0.6 liters
Product Care Instructions	Hand Wash Only

9. Warranty and Support

Your Hurom H-AA Cold Press Juicer Machine comes with a manufacturer's warranty. Please refer to the warranty card included in your packaging for specific terms and conditions.
