## Viceroy 471075-05

# Viceroy 471075-05 Automatic Watch User Manual

Model: 471075-05

---

## INTRODUCTION

---

This manual provides essential information for the proper use, care, and maintenance of your Viceroy 471075-05 Automatic Watch. Please read this manual thoroughly before using your watch to ensure optimal performance and longevity.

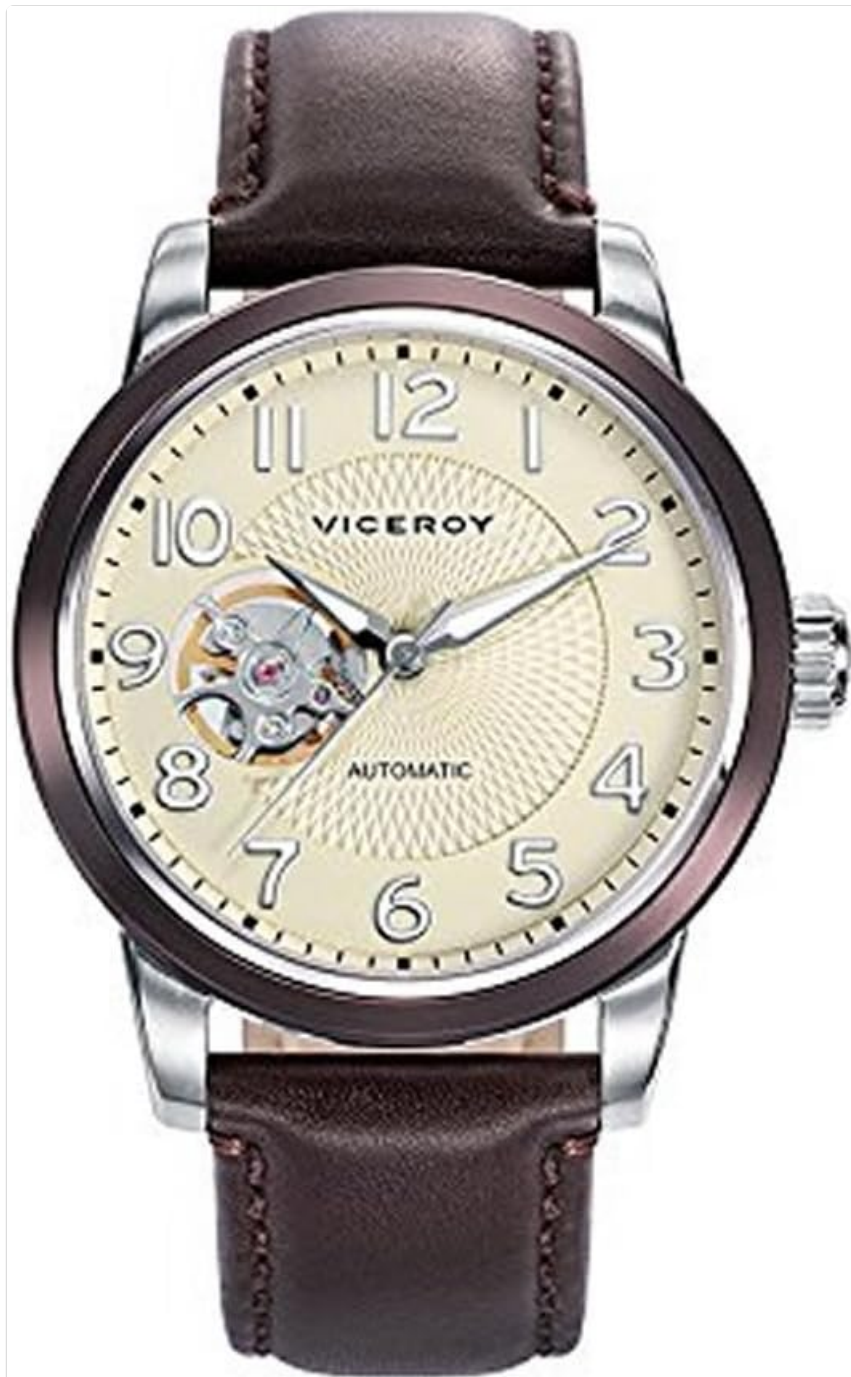

Image: Viceroy 471075-05 Automatic Watch. This image displays the watch with its brown leather strap, silver-colored steel case, and cream-colored dial. The automatic movement is visible through a small window on the dial.

## PRODUCT OVERVIEW

---

The Viceroy 471075-05 is a men's automatic watch featuring a classic design. It is powered by an automatic movement, meaning it winds itself with the motion of your wrist, eliminating the need for a battery. Key features include:

- Brown leather strap for comfortable wear.
- Durable silver-colored steel case.
- Elegant cream-colored dial with visible automatic mechanism.
- Water resistance up to 50 meters (5 ATM).

## SETUP

---

## Initial Winding

As an automatic watch, the Viceroy 471075-05 is powered by the movement of your wrist. If the watch has stopped, it may need an initial manual wind to start the movement.

1. Gently unscrew the crown (if it's a screw-down crown) or pull it out to the first position.
2. Turn the crown clockwise approximately 20-30 times. This will build up enough power reserve to start the watch.
3. Push the crown back in and screw it down (if applicable) to ensure water resistance.

Once started, wearing the watch for at least 8-10 hours a day will keep it wound. If not worn regularly, consider using a watch winder to maintain its power reserve.

## OPERATING THE WATCH

---

### Setting the Time

1. Pull the crown out to the outermost position (usually the second click). The second hand will typically stop.
2. Turn the crown clockwise or counter-clockwise to set the hour and minute hands to the correct time.
3. Once the time is set, push the crown back into its normal operating position. If it's a screw-down crown, gently push and screw it back into place to ensure water resistance.

### Water Resistance

This watch is water resistant up to 50 meters (5 ATM). This means it is suitable for short periods of recreational swimming, but not for diving or snorkeling. Avoid operating the crown or pushers when the watch is wet or submerged to prevent water ingress.

## MAINTENANCE

---

### Cleaning

- Wipe the watch case and crystal with a soft, dry cloth regularly to remove dust and fingerprints.
- For the leather strap, avoid prolonged exposure to water, direct sunlight, and harsh chemicals, as these can damage the material. Clean with a damp cloth and mild soap if necessary, then dry thoroughly.

### Storage

When not wearing the watch, store it in a cool, dry place away from direct sunlight and strong magnetic fields. A watch box or a watch winder is ideal for storage.

### Service

Automatic watches benefit from periodic servicing, typically every 3-5 years, to ensure the movement remains lubricated and accurate. Contact an authorized Viceroy service center for professional maintenance.

## TROUBLESHOOTING

---

- **Watch has stopped or is running slow:**  
Ensure the watch is fully wound. Wear it for a full day or manually wind it as described in the "Initial Winding" section. If the issue persists, the watch may require servicing.

- **Condensation under the crystal:**

This indicates moisture has entered the watch. Immediately take the watch to an authorized service center to prevent further damage to the movement.

- **Hands are not moving smoothly:**

This could be a sign of low power reserve or a mechanical issue. Try winding the watch. If the problem continues, professional inspection is recommended.

## SPECIFICATIONS

Feature	Detail
Brand	Viceroy
Model Number	471075-05
Movement Type	Automatic
Gender	Men's
Case Material	Silver-colored Steel
Case Diameter	40 mm
Dial Color	Cream
Strap Material	Brown Leather
Water Resistance	50 meters (5 ATM)
ASIN	B01M3OBD6J
