6. MAINTENANCE

6.1. Cleaning the Monitor

- Always disconnect the power cable before cleaning.
- Use a soft, dry, lint-free cloth to gently wipe the screen and exterior surfaces.
- Do not use abrasive cleaners, waxes, or solvents as they can damage the monitor's finish.

6.2. Storage

When not in use for extended periods, store the monitor in a cool, dry place, preferably in its original packaging to protect it from dust and physical damage.

7. TROUBLESHOOTING

If you encounter issues with your monitor, refer to the following troubleshooting guide:

Problem	Possible Solution
No power	Ensure the power cable is securely connected to both the monitor and a working wall outlet. Check if the power indicator light is on.
No signal / Screen is blank	Verify that the video cable (HDMI or VGA) is securely connected to both the monitor and your computer. Ensure your computer is powered on and not in sleep mode. Select the correct input source via the OSD menu.

Problem	Possible Solution
Poor picture quality (blurry, distorted)	Adjust the display resolution on your computer to the monitor's native resolution (1920x1080). Adjust brightness, contrast, and sharpness settings in the OSD menu. Check the video cable for damage.
Screen flickering	Ensure the refresh rate is set correctly in your computer's display settings. Check for any nearby electronic devices that might cause interference.
Colors appear incorrect	Adjust color settings in the OSD menu. Reset picture settings to factory defaults if necessary.
