

## Bulova 98R234

# Bulova Marine Star 'Series L' Ladies' Quartz Watch

Model: 98R234 - Instruction Manual

## INTRODUCTION

---

This manual provides essential instructions for the proper setup, operation, and maintenance of your Bulova Marine Star 'Series L' Ladies' Quartz Watch, Model 98R234. This timepiece features a precise quartz movement, a durable sapphire crystal, 100-meter water resistance, and elegant diamond accents on a mother-of-pearl dial.

## SETUP

---

### Setting the Time and Date

- Pull the Crown:** Gently pull the crown (the knob on the side of the watch) out to the first click position to set the date, or to the second click position to set the time.
- Adjust the Date:** If in the first click position, turn the crown clockwise or counter-clockwise to adjust the date.
- Adjust the Time:** If in the second click position, turn the crown to move the hands to the correct time. Ensure you differentiate between AM and PM for accurate date change.
- Push the Crown Back:** Once the time and date are set, push the crown back into its normal position to start the watch movement.

## Bracelet Adjustment

The stainless steel bracelet is designed for a secure and comfortable fit. If adjustment is needed, it is recommended to visit a professional jeweler to add or remove links to ensure proper sizing and to avoid damage to the watch or bracelet.

## OPERATING THE WATCH

---

Your Bulova Marine Star watch is powered by a reliable quartz movement, ensuring accurate timekeeping. Once the time and date are set, the watch will operate continuously until the battery requires replacement.

## MAINTENANCE

---

### Cleaning

To maintain the appearance of your watch, wipe it regularly with a soft, dry cloth. For stainless steel components, a slightly damp cloth can be used, followed by drying thoroughly. Avoid using harsh chemicals or abrasive materials.

### Water Resistance

This watch is water resistant to 100 meters (330 feet). This rating makes it suitable for swimming, snorkeling, and showering. However, it is not recommended for scuba diving. Always ensure the crown is fully pushed in before exposing the watch to water.

### Battery Replacement

As a quartz watch, it is powered by a lithium-ion battery. When the watch stops or begins to lose time, the battery may need replacement. It is recommended to have the battery replaced by a qualified watch technician to ensure the water resistance seal is properly maintained.

## Sapphire Crystal Care

The watch features a scratch-resistant sapphire crystal. While highly durable, it is not entirely impervious to damage. Avoid extreme impacts and contact with very hard or sharp objects to prevent scratches or cracks.

## TROUBLESHOOTING

- **Watch Not Running:** Check if the crown is fully pushed in. If it is, the battery may need replacement.
- **Incorrect Time/Date:** Refer to the "Setting the Time and Date" section to reset the watch.
- **Condensation Under Crystal:** This may indicate a breach in the water resistance. Seek professional service immediately to prevent internal damage.

## SPECIFICATIONS

|                        |                                 |
