Hitachi 337581

Hitachi 337581 Panel Instruction Manual

Model: 337581 | Brand: Hitachi

Introduction

This manual provides essential information for the proper installation, function, and maintenance of your Hitachi 337581 Panel. This panel is a genuine Hitachi replacement part designed to meet the highest standards of performance and durability for compatible power tools.

The Hitachi 337581 Panel is an integral component for specific Hitachi (now Metabo HPT) power tools, including models like DH40MEY and H45MEY. It is rigorously tested to ensure compatibility and reliability, maintaining the quality and performance of your equipment.

Figure 1: Overview of the Hitachi 337581 Panel and related components. This image displays various parts that may be included or associated with the panel, such as wiring, a plastic bushing, a metal bracket, a small black component with a spring, a black air filter/regulator, and four carbon brushes with springs.

Safety Information

Always observe basic safety precautions when installing or handling power tool components. Failure to do so can result in serious injury or damage to the tool.

- **Disconnect Power:** Before attempting any installation, repair, or maintenance, always ensure the power tool is unplugged from its power source.
- **Wear Personal Protective Equipment (PPE):** Use safety glasses, gloves, and other appropriate PPE as required by the specific task.
- **Use Correct Tools:** Ensure you have the proper tools for disassembly and reassembly to prevent damage to

components.

- **Work in a Well-Lit Area:** Adequate lighting helps prevent errors and accidents.
- **Consult Tool Manual:** Refer to the original power tool's instruction manual for specific disassembly and reassembly procedures.

Installation (Setup)

The Hitachi 337581 Panel is a replacement part. Its installation typically involves replacing an existing, worn, or damaged panel within a compatible power tool. The exact steps may vary depending on the specific tool model (e.g., DH40MEY, H45MEY).

General Installation Steps:

1. **Preparation:**
    - Ensure the power tool is completely disconnected from its power source.
    - Clear your workspace and gather necessary tools (e.g., screwdrivers, wrenches).
2. **Access the Panel:**
    - Carefully disassemble the power tool casing or relevant sections to gain access to the existing panel. Refer to your tool's specific service manual if available.
3. **Remove Old Panel:**
    - Note the orientation and connections of the old panel. Take photos if necessary for reference.
    - Disconnect any wires or fasteners securing the old panel.
    - Carefully remove the old panel from its housing.
4. **Install New Panel:**
    - Position the new Hitachi 337581 Panel in the exact location and orientation as the old one.
    - Secure the panel with its fasteners.
    - Reconnect all wires, ensuring correct polarity and secure connections.
5. **Reassembly and Testing:**
    - Carefully reassemble the power tool casing.
    - Before full operation, perform a brief test to ensure the panel functions correctly and the tool operates as expected.

Operation

The Hitachi 337581 Panel is a component part and does not have independent operational controls. Its function is integrated into the overall operation of the power tool it is installed in. Once correctly installed, the panel contributes to the proper functioning of the tool's electrical or mechanical systems.

Refer to the specific instruction manual of your power tool (e.g., Hitachi DH40MEY, H45MEY) for detailed operating instructions, safety guidelines, and usage recommendations for the complete tool.

Maintenance

Proper maintenance extends the life of your power tool and its components. While the 337581 Panel itself requires minimal direct maintenance, general care of the tool is important.

- **Regular Cleaning:** Keep the power tool clean and free from dust, debris, and moisture. Use a dry cloth or soft brush.
- **Inspect Connections:** Periodically check all electrical connections within the tool for tightness and signs of wear or corrosion.
- **Storage:** Store the power tool in a dry, clean environment away from extreme temperatures.
- **Professional Inspection:** If you suspect any issues with the panel or the tool's internal components, it is recommended to have it inspected by a qualified service technician.

Troubleshooting

If your power tool is not functioning correctly after replacing the panel, consider the following common troubleshooting steps:

- **No Power / Tool Not Starting:**
  - Ensure the tool is properly plugged into a working power outlet.
  - Check all internal wiring connections to the panel. Ensure they are secure and correctly oriented.
  - Inspect the power cord for damage.
  - Verify that the power switch of the tool is functioning correctly.
- **Intermittent Operation:**
  - Loose connections to the panel can cause intermittent power. Re-check all connections.
  - Inspect for any signs of short circuits or damaged insulation on wires.
- **Unusual Noises or Smells:**
  - Immediately disconnect power.
  - These symptoms often indicate a serious internal issue. Do not attempt to operate the tool. Seek professional service.
- **Tool Performance Issues:**
  - If the tool's performance is degraded (e.g., reduced power, overheating), the issue might not be the panel itself but other components like motor brushes (if applicable, as shown in Figure 1), bearings, or gears.
  - Ensure all other components were reassembled correctly.

If troubleshooting steps do not resolve the issue, it is recommended to consult a qualified technician or contact Hitachi (Metabo HPT) customer support.

Specifications

Key specifications for the Hitachi 337581 Panel:

Attribute	Value
Manufacturer	Koki Holdings America, Ltd
Part Number	337581
Item Weight	0.81 ounces
Product Dimensions	1 x 1 x 1 inches
Country of Origin	Malaysia
Item Model Number	337581
Item Package Quantity	1
Measurement System	Metric
Included Components	Hitachi 337581 PANEL DH40MEY H45MEY
Batteries Required?	No
ASIN	B01M8N8EBC
Date First Available	October 26, 2016

Warranty Information

Specific warranty terms for replacement parts like the Hitachi 337581 Panel are typically provided by the manufacturer, Koki Holdings America, Ltd (Hitachi/Metabo HPT). Warranty coverage may vary based on the purchase location and specific product policies.

For detailed warranty information, including coverage period and conditions, please refer to the official Hitachi (Metabo HPT) website or contact their customer service directly. Keep your proof of purchase for any warranty claims.

Customer Support

For further assistance, technical support, or inquiries regarding the Hitachi 337581 Panel or other Hitachi (Metabo HPT) products, please contact the manufacturer directly.

- **Manufacturer:** Koki Holdings America, Ltd (formerly Hitachi Power Tools, now Metabo HPT)
- **Official Website:** www.metabo-hpt.com (Note: Hitachi Power Tools has rebranded to Metabo HPT)

- **Customer Service:** Refer to the official website for contact numbers, email addresses, or online support forms.

When contacting support, please have your product model number (337581) and any relevant purchase information ready.
