Armitron Men's 20/5118SVSVBN Watch Instruction Manual

Model: 20/5118SVSVBN

INTRODUCTION

This manual provides essential instructions for the setup, operation, and maintenance of your Armitron Men's 20/5118SVSVBN Silver-Tone and Brown Croco-Grain Leather Strap Watch. Please read this manual thoroughly to ensure proper use and care of your timepiece.

PRODUCT OVERVIEW

The Armitron 20/5118SVSVBN watch features a silver-tone rectangular case, a white dial with silver-tone hands and markers, and a brown croco-grain leather strap. It is powered by a Japanese-quartz movement.

Image 1: Front view of the Armitron 20/5118SVSVBN watch, showcasing the silver-tone rectangular case, white dial with silver-tone hands and markers, and brown croco-grain leather strap.

Components:

- **Crown:** Used for setting the time.
- **Case:** Silver-tone rectangular metal casing.
- **Dial:** White dial with Roman numerals (XII, VI) and stick markers.
- **Hands:** Hour, minute, and second hands.
- **Strap:** Brown croco-grain leather strap with a buckle closure.
- **Crystal:** Mineral crystal lens.

SETUP

Setting the Time:

1. Gently pull the crown out to the time-setting position.
2. Rotate the crown clockwise or counter-clockwise to adjust the hour and minute hands to the correct time.
3. Once the time is set, push the crown back into its original position to start the watch movement.

Battery Information:

This watch is powered by a Japanese-quartz movement and requires one LR44 battery. The battery is included with the watch. When the battery needs replacement, it is recommended to have it replaced by a qualified watch technician to ensure proper sealing and water resistance.

OPERATING INSTRUCTIONS

Water Resistance:

Your Armitron 20/5118SVB watch is water resistant to 50 meters (165 feet). This rating means the watch is suitable for short periods of recreational swimming. It is **not** suitable for diving or snorkeling. To maintain water resistance:

- Ensure the crown is fully pushed in before any contact with water.
- Do not operate the crown while the watch is wet or submerged in water.
- Avoid exposing the watch to hot water, steam, or extreme temperature changes, as this can compromise the seals.

MAINTENANCE

Cleaning Your Watch:

- Wipe the watch case and crystal with a soft, dry, lint-free cloth.
- For the leather strap, avoid prolonged exposure to water, direct sunlight, and harsh chemicals, as these can cause damage or discoloration.
- If the watch comes into contact with saltwater, rinse it gently with fresh water and dry thoroughly with a soft cloth.

Strap Care:

The brown croco-grain leather strap is designed for durability and comfort. To extend its lifespan:

- Avoid excessive moisture and sweat.
- Allow the strap to air dry naturally if it gets wet.
- Periodically clean the strap with a specialized leather cleaner, following the product's instructions.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Watch stops or runs intermittently.	Depleted battery.	Replace the LR44 battery. It is recommended to have this done by a professional.
Time is incorrect.	Crown not fully pushed in after setting; accidental adjustment.	Reset the time as per "Setting the Time" instructions and ensure the crown is fully seated.
Moisture under the crystal.	Compromised water resistance due to impact or improper crown handling.	Immediately take the watch to a qualified watch repair service to prevent further damage.

SPECIFICATIONS

Model Number	20/5118SVSVBN
Movement	Japanese Quartz
Case Material	Silver-Tone Metal
Case Diameter	33 Millimetres
Crystal	Mineral Crystal Lens
Strap Material	Brown Croco-Grain Leather
Water Resistance	50 meters (165 feet)
