

Paul Anthony H1517BK

Paul Anthony Style Pro 2000W Hair Dryer User Manual

Model: H1517BK

Brand: Paul Anthony

1. INTRODUCTION AND OVERVIEW

The Paul Anthony Style Pro 2000W Hair Dryer is engineered for efficient and versatile hair styling. This powerful yet quiet appliance offers a range of features to cater to different hair types and styling needs. With its robust 2000W motor, multiple heat and speed settings, and a precision concentrator nozzle, it provides a professional drying experience. Designed for user convenience, it includes a thermal cut-out safety device for protection and a practical hanging loop for easy storage.

2. SAFETY INFORMATION

Please read all safety instructions carefully before using the appliance. Failure to follow these instructions may result in electric shock, fire, or serious injury.

- Always ensure the hair dryer is unplugged from the power outlet before cleaning, maintenance, or when not in use.
- Do not use this appliance near water, in a bathroom, or over a basin containing water. Keep it away from bathtubs, showers, or other vessels containing water.
- This appliance is equipped with a thermal cut-out safety device to prevent overheating. If the device overheats, it will automatically shut off. Allow it to cool down completely (approximately 15-20 minutes) before attempting to use it again.
- Do not block the air intake or outlet during operation. Ensure the filter is clean to maintain proper airflow.
- Do not operate the appliance with a damaged cord or plug. If the appliance malfunctions or has been damaged in any way, discontinue use and contact customer support.
- Keep the cord away from heated surfaces. Do not wrap the cord around the appliance during storage.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory, or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

3. PRODUCT COMPONENTS

The Paul Anthony Style Pro 2000W Hair Dryer package typically includes the following items:

- Paul Anthony Style Pro 2000W Hair Dryer Unit
- Narrow Concentrator Nozzle
- Instruction Manual (this document)

The Paul Anthony Style Pro 2000W Hair Dryer in matte black, featuring its sleek design and control buttons.

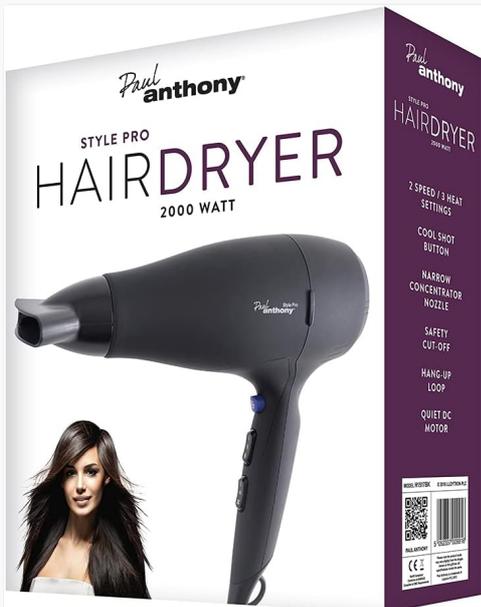

The hair dryer with the narrow concentrator nozzle attached, ready for precise styling.

4. SETUP

Follow these steps to set up your Paul Anthony Style Pro 2000W Hair Dryer:

1. **Unpacking:** Carefully remove the hair dryer and all accessories from the packaging. Retain the packaging for future storage or transport.
2. **Power Connection:** Ensure your hands are dry before handling the plug. Insert the power cord into a standard electrical outlet (220-240V, 50/60Hz). The cord length is 1.6 meters, providing ample reach.
3. **Attaching the Concentrator Nozzle:** If desired, align the narrow concentrator nozzle with the front barrel of the hair dryer. Push it firmly into place until it is securely attached. This attachment can be rotated to direct airflow as needed.

5. OPERATING INSTRUCTIONS

Operating your Paul Anthony Style Pro 2000W Hair Dryer is straightforward:

1. **Power On/Off:** Locate the main power switch on the handle. Slide it to the 'On' position to activate the hair dryer.
2. **Speed Settings:** Use the speed control switch to select your desired fan speed. There are 2 settings available:
 - **Low Speed:** For gentle drying or precise styling.
 - **High Speed:** For fast drying of thicker or longer hair.
3. **Heat Settings:** Adjust the heat control switch to choose from 3 airflow heat settings:
 - **Cool:** Ideal for setting your hairstyle and adding shine, or for sensitive scalps.
 - **Warm:** Suitable for general drying and everyday use.
 - **Hot:** For quick drying and initial styling, especially for damp hair.
4. **Cool Shot Function:** Press and hold the blue cool shot button (typically located above the main switches) to instantly deliver a burst of cool air. This feature is excellent for locking in your style and reducing frizz after drying.
5. **Styling with Concentrator Nozzle:** For targeted drying and precise styling, ensure the concentrator nozzle is attached. Direct the concentrated airflow to specific sections of hair while brushing or using a styling tool.
6. **Folding Handle (if applicable):** If your model features a folding handle, ensure the unit is cool and unplugged before gently folding the handle for compact storage or travel.

6. MAINTENANCE

Regular maintenance ensures optimal performance and extends the lifespan of your hair dryer:

1. **Cleaning the Air Filter:** The rear air filter can accumulate lint and dust, which may affect performance and lead to overheating. To clean:

- Ensure the hair dryer is unplugged and completely cool.
 - Gently twist or pull off the rear grille/filter cover.
 - Use a soft brush (e.g., an old toothbrush) or a dry cloth to remove any accumulated debris from the filter mesh.
 - Reattach the grille/filter cover securely. Perform this cleaning regularly, especially if you notice reduced airflow.
2. **Cleaning the Exterior:** Wipe the exterior surface of the hair dryer with a soft, damp cloth. Do not use abrasive cleaners, solvents, or harsh chemicals, as these can damage the finish. Never immerse the appliance in water or any other liquid.
 3. **Storage:** After each use, allow the hair dryer to cool down completely before storing. You can use the integrated hanging loop for convenient storage on a hook. If your model has a folding handle, gently fold it for compact storage in a drawer or travel bag.

7. TROUBLESHOOTING

If you encounter any issues with your Paul Anthony Style Pro 2000W Hair Dryer, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Hair dryer does not turn on.	<ul style="list-style-type: none"> • Not plugged in correctly. • Power outlet is not working. • Thermal cut-out safety device activated. • Faulty power cord or plug fuse. 	<ul style="list-style-type: none"> • Ensure the power cord is securely plugged into a functional electrical outlet. • Test the outlet with another appliance. • Unplug the hair dryer and allow it to cool down for 15-20 minutes. Clean the air filter. • Check the fuse in the plug (for UK models) and replace if necessary. Do not attempt to repair the cord.
Hair dryer overheats and shuts off automatically.	<ul style="list-style-type: none"> • Air filter is blocked with lint/dust. • Air intake/outlet is obstructed during use. • Prolonged continuous use. 	<ul style="list-style-type: none"> • Unplug the unit and allow it to cool completely. Clean the air filter as described in the Maintenance section. • Ensure nothing is blocking the air vents during operation. • Allow the appliance to cool down between uses if operating for extended periods.

Problem	Possible Cause	Solution
Weak or inconsistent airflow.	<ul style="list-style-type: none"> Air filter is dirty or blocked. Internal fan obstruction. 	<ul style="list-style-type: none"> Unplug the hair dryer and clean the air filter thoroughly. If the problem persists after cleaning the filter, discontinue use and contact customer support. Do not attempt to open the appliance.
