

AURLANE LAV301

Aurlane LAV301 Bathroom Vanity Unit White - Instruction Manual

Model: LAV301

INTRODUCTION

This manual provides essential instructions for the assembly, operation, maintenance, and troubleshooting of your Aurlane LAV301 Bathroom Vanity Unit. Please read these instructions carefully before installation and use to ensure proper function and longevity of your product.

SAFETY INFORMATION

- Always ensure the unit is installed on a stable and level surface.
- Do not overload drawers or cabinets.
- Keep small parts away from children during assembly.
- If using power tools for assembly, follow their safety guidelines.

PACKAGE CONTENTS

Verify that all components are present before beginning assembly. If any parts are missing or damaged, please contact customer support.

- 1 x Aurlane LAV301 Bathroom Vanity Unit (includes cabinet, basin, and mirror)
- Assembly hardware (screws, dowels, hinges, drawer slides)
- Instruction leaflet (this document)

SETUP AND ASSEMBLY

Assembly typically requires two people. Tools required: Phillips head screwdriver, flathead screwdriver, adjustable wrench, level, drill (optional for wall mounting).

Step 1: Unpacking and Inspection

1. Carefully unpack all components from the packaging.
2. Inspect all parts for any damage or defects. Report any issues to your retailer immediately.
3. Lay out all hardware and components on a clean, soft surface to prevent scratches.

Step 2: Cabinet Assembly

1. Follow the detailed diagrams provided in the separate assembly guide (if included) to construct the main cabinet frame.
2. Attach the drawer slides to the cabinet sides according to the markings.
3. Assemble the drawers and install them into the cabinet.

4. Attach the door hinges to the cabinet and doors, then mount the doors. Adjust hinges for proper alignment.

Image 2: Interior storage of the Aurlane LAV301. This image displays the open cabinet doors revealing internal shelving and an open drawer, illustrating the storage capacity of the unit.

Step 3: Basin and Mirror Installation

1. Carefully place the ceramic basin onto the top of the assembled cabinet. Ensure it is properly aligned and secured (fasteners may vary, refer to specific hardware instructions).
2. Install the mirror securely to the wall above the vanity unit. Use appropriate wall anchors for your wall type. Ensure the mirror is level.
3. Connect plumbing for the basin (faucet and drain are not included and must be purchased separately). Ensure all connections are watertight.

Image 3: Front view of the Aurlane LAV301 Bathroom Vanity Unit. This image provides a clear, unobstructed view of the vanity unit from the front, highlighting its design and features like the integrated sink and handles.

OPERATING INSTRUCTIONS

The Aurlane LAV301 Bathroom Vanity Unit is designed for daily use in a bathroom environment.

- **Drawers:** The unit features two drawers for organized storage. Pull gently to open and push firmly to close. Avoid forcing drawers if they feel stiff.
- **Cabinet Doors:** The two cabinet doors provide access to a larger storage area. Use the handles to open and close.
- **Basin:** The deep ceramic basin is suitable for standard bathroom use. Ensure the drain is clear to prevent blockages.
- **Mirror:** The tall mirror provides ample reflection space.

CARE AND MAINTENANCE

Proper care will extend the life and appearance of your vanity unit.

- **Cleaning the Cabinet:** Wipe surfaces with a soft, damp cloth. Use a mild, non-abrasive cleaner if necessary. Avoid harsh chemicals or abrasive sponges, which can damage the lacquered finish.
- **Cleaning the Basin:** Clean the ceramic basin with standard bathroom cleaners. Rinse thoroughly after cleaning.
- **Cleaning the Mirror:** Use a glass cleaner and a soft, lint-free cloth.
- **Spills:** Wipe up water spills immediately to prevent moisture damage to the engineered wood components.
- **Hardware:** Periodically check and tighten any loose screws on hinges or drawer slides.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Drawers stick or do not close smoothly.	Misaligned drawer slides, obstruction, or loose screws.	Check drawer slide alignment and tighten screws. Remove any obstructions.
Cabinet doors are misaligned.	Hinges need adjustment.	Adjust the screws on the hinges to align the doors.
Water leaks from basin plumbing.	Loose connections or improper sealing.	Ensure all plumbing connections are tight and properly sealed with plumber's tape or sealant. Consult a professional plumber if necessary.
Unit feels unstable.	Uneven floor or loose assembly.	Ensure the unit is on a level surface. Check all assembly screws and tighten if loose.
