WELLAND WSV131-480

WELLAND Dover Floating Shelf Instruction Manual

Model: WSV131-480 WH

Brand: WELLAND

1. INTRODUCTION

This manual provides detailed instructions for the installation, use, and maintenance of your WELLAND 8" Deep Floating Shelf. Please read these instructions carefully before beginning installation to ensure safe and proper use of the product. This floating shelf is designed to offer a stylish and functional storage solution for various items in your home or office.

2. SAFETY INFORMATION

- **Weight Capacity:** Do not exceed the maximum weight capacity of 25 pounds (11.3 kg). Overloading the shelf can lead to damage or injury.
- **Wall Type:** Ensure the wall material is suitable for mounting. For drywall, use appropriate anchors. For stud mounting, ensure screws are securely fastened into the stud.
- **Secure Installation:** Always ensure the mounting bracket is securely fastened to the wall and the shelf is firmly seated on the bracket rods. A loose installation can cause the shelf to fall.
- **Tools:** Use appropriate tools for installation and follow all safety guidelines for tool usage.
- **Children and Pets:** Keep small parts and hardware out of reach of children and pets during assembly.

3. PACKAGE CONTENTS

Verify that all components are present before beginning installation:

- 1 x Floating Shelf (Approximately 48" L x 7.9" W x 1.25" T)
- 1 x Mounting Bracket

- 1 x Hardware Set (screws, wall anchors)
- 1 x Installation Instructions

4. SETUP AND INSTALLATION

Tools Recommended (Not Included):

- Pencil
- Measuring Tape
- Level
- Drill with appropriate drill bits
- Screwdriver (Phillips head recommended)
- Stud Finder (if mounting into studs)

Installation Steps:

1. **Choose Location:** Select a suitable wall location. Ensure there are no electrical wires or plumbing pipes behind the drilling area.
2. **Mark Mounting Points:** Hold the mounting bracket against the wall at the desired height. Use a level to ensure it is perfectly horizontal. Mark the positions for the screw holes with a pencil.
3. **Drill Pilot Holes:** Drill pilot holes at the marked positions. The size of the drill bit will depend on whether you are drilling into a wall stud or using wall anchors for drywall. If using wall anchors, ensure the hole size matches the anchor specifications.
4. **Install Wall Anchors (if needed):** If drilling into drywall without a stud, insert the provided wall anchors (or suitable alternatives) into the pilot holes.
5. **Attach Mounting Bracket:** Align the mounting bracket with the drilled holes. Insert screws through the bracket and into the wall anchors or directly into wall studs. Tighten all screws securely until the bracket is firm against the wall. *Note: The hardware set includes upgraded metal anchors and thickening hardware tubes (3 mm) for increased sturdiness.*
6. **Mount the Shelf:** Carefully slide the floating shelf onto the rods of the installed mounting bracket. Apply gentle, even pressure until the shelf is fully seated and flush against the wall. The shelf is designed to fit snugly.

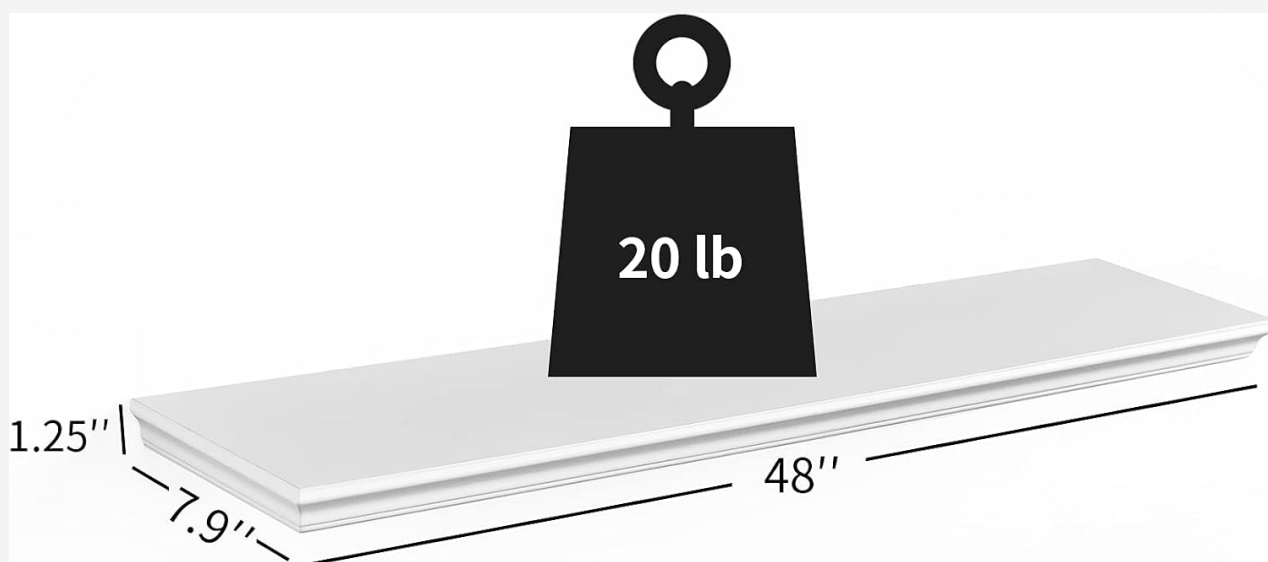

Image 2: A visual representation of the shelf's dimensions (48" L x 7.9" W x 1.25" T) and its maximum load capacity of 20 lbs.

5. OPERATING AND USAGE

Once installed, your WELLAND Floating Shelf is ready for use. It is designed for organizing and displaying various items such as books, CDs, decorative objects, and other collectibles. The shelf has a maximum weight capacity of **25 pounds (11.3 kg)**. Distribute weight evenly across the shelf to prevent stress on the mounting points. The shelf features a gloss paint finish, which is wear-resisting and provides an elegant appearance. Its special curved line design adds a contemporary style to your home decor.

6. MAINTENANCE

To maintain the appearance and longevity of your WELLAND Floating Shelf, follow these simple care instructions:

- **Cleaning:** Wipe the shelf with a dry, soft cloth to remove dust and light smudges. Avoid abrasive cleaners or harsh chemicals, as these can damage the gloss finish.
- **Spills:** In case of spills, wipe immediately with a dry cloth.
- **Inspection:** Periodically check the mounting screws and bracket to ensure they remain tight and secure.

7. TROUBLESHOOTING

- **Shelf is Wobbly:**
 - Ensure all mounting screws are fully tightened into the wall or anchors.
 - Verify that the wall anchors used are appropriate for your wall type and are installed correctly. If the

provided anchors feel insufficient for your specific wall condition, consider using stronger aftermarket anchors (e.g., toggle bolts for drywall).

- Confirm the shelf is fully seated onto the bracket rods and flush against the wall. Sometimes, a slight adjustment or gentle tap may be needed.
- Check if the wall surface is even. Uneven walls can affect stability.

• **Shelf Does Not Sit Flush:**

- Ensure the mounting bracket is installed perfectly straight and flush against the wall.
- Verify that the holes in the shelf align correctly with the bracket rods.
- Inspect the shelf and bracket for any manufacturing defects or damage that might prevent a flush fit.

• **Difficulty Sliding Shelf onto Rods:**

- Ensure the bracket rods are not bent or misaligned.
- Apply gentle, even pressure. Do not force the shelf, as this could damage it or the bracket.

8. SPECIFICATIONS

Feature	Detail
Brand	WELLAND
Model Name	Dover
Model Number	WSV131-480 WH
Material	Engineered Wood (MDF with honeycomb cardboard inside)
Color	White
Finish Type	Gloss Paint Finish
