OPERATING INSTRUCTIONS (GAMEPLAY)

The goal of Temple Trap is to slide the wall pieces to create an unobstructed path for the Adventurer to escape the temple. The Adventurer must move from its starting position to one of the exit points on the edge of the board.

Gameplay Rules:

- **Sliding Walls:** The 8 puzzle pieces can be slid horizontally or vertically within the grooves of the game board.
- **Adventurer Movement:** The Adventurer piece can only move through open pathways. It cannot jump over walls or move diagonally.
- **No Lifting Pieces:** Pieces should not be lifted from the board during play, only slid.
- **Escape Route:** A solution is found when a continuous path is created from the Adventurer's starting position to an exit point on the board's perimeter.

Solving Challenges:

Each challenge in the booklet presents a unique starting configuration. Analyze the layout and plan your moves to create the escape path. If you get stuck, refer to the solutions provided at the back of the challenge booklet.
