MAINTENANCE

Cleaning

To clean the Hot Wheels Tail Dragger, gently wipe it with a soft, dry cloth. Avoid using harsh chemicals, abrasive cleaners, or excessive water, as these can damage the paint finish or plastic components. For stubborn dirt, a slightly damp cloth can be used, followed by immediate drying.

Storage

Store the vehicle in a cool, dry place away from direct sunlight and extreme temperatures. Prolonged exposure to heat or moisture can affect the integrity of the materials. Keeping the vehicle in its original packaging or a dedicated storage container can help preserve its condition, especially for collectors.

TROUBLESHOOTING

Common Issues

- **Wheels not spinning freely:** Check for any debris (e.g., lint, hair) caught in the axles. Gently remove any obstructions. Ensure the wheels are not bent or damaged.
- **Paint chipping:** This can occur with normal play. To minimize, avoid rough surfaces and impacts. For collectors, handle with care.
- **Vehicle not performing on tracks:** Ensure track pieces are fully connected and free of obstructions. Verify the vehicle's wheels are clean and undamaged.
