2. INSTALLATION INSTRUCTIONS

Follow these steps to correctly install your Dr. Scholl's Tri-Comfort Insoles:

1. **Prepare Your Shoes:** Wipe the inside of your shoes clean to ensure the adhesive backing of the insoles will adhere properly.
2. **Identify Left and Right:** Look for the marking on the bottom of each insole to distinguish between the left and right inserts.
3. **Remove Backing:** Carefully remove the yellow protective film from the heel area of the insole to expose the adhesive.
4. **Insert into Shoe:** Place the 3/4 length insole into the appropriate shoe, aligning the heel cushion with the back of your shoe. The adhesive will help secure the insole in place. These insoles are designed to fit on top of your shoes' current insoles, even if they are removable.
