## Ariete 1344

# Ariete 1344 Breakfast Station Instruction Manual

Model: 1344 | Brand: Ariete

## 1. PRODUCT OVERVIEW

The Ariete 1344 Breakfast Station is a versatile 3-in-1 appliance designed to simplify your morning routine. It combines an electric Moka pot for rich coffee, a milk frother for creamy beverages, and a kettle for hot water, all in one compact unit.

This station allows for simultaneous operation of the coffee maker and milk frother/kettle, enabling you to prepare a variety of drinks such as Moka coffee, Mochaccino, Iced Cappuccino, and Matcha Latte with ease.

## 2. IMPORTANT SAFETY INSTRUCTIONS

Please read all instructions carefully before using the Ariete 1344 Breakfast Station. Failure to follow these instructions may result in electric shock, fire, or serious injury.

- Ensure the appliance is placed on a stable, flat, heat-resistant surface, away from edges.
- Do not immerse the base unit, cord, or plug in water or any other liquid.
- Keep the appliance out of reach of children.
- Do not operate the appliance with a damaged cord or plug. Contact authorized service personnel for repairs.
- Avoid touching hot surfaces. Use handles or knobs.
- Unplug from the outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts, and before cleaning the appliance.
- The Moka pot and milk frother/kettle are **NOT dishwasher safe**. Hand wash only.
- Use only cold water for the Moka pot and kettle functions.
- Do not overfill the Moka pot or milk frother/kettle beyond their maximum fill lines.

### 3. PRODUCT COMPONENTS

The Ariete 1344 Breakfast Station consists of the following main components:

- **Main Base Unit:** Provides power and control buttons for both appliances.
- **Electric Moka Pot:** For brewing coffee. Includes a water chamber, coffee filter, and upper collection chamber.
- **Milk Frother / Kettle:** A dual-function jug for frothing milk or boiling water.
- **Measuring Scoop:** For coffee grounds.

Figure 2: Main components of the Breakfast Station

### 4. INITIAL SETUP

1. **Unpacking:** Carefully remove all components from the packaging. Retain packaging for future storage or transport.

2. **Initial Cleaning:** Before first use, wash the Moka pot and milk frother/kettle with warm, soapy water. Rinse thoroughly and dry completely. Do not immerse the main base unit in water.
3. **Placement:** Place the main base unit on a dry, stable, and level surface, away from any heat sources or water. Ensure there is adequate ventilation around the appliance.
4. **Power Connection:** Plug the power cord into a suitable electrical outlet.

## 5. OPERATING INSTRUCTIONS

The Ariete 1344 Breakfast Station offers three primary functions: Moka coffee brewing, milk frothing, and water heating.

### 5.1. Electric Moka Pot Operation

1. **Fill Water:** Unscrew the Moka pot's upper chamber and remove the filter funnel. Fill the lower water chamber with cold water up to the safety valve level.
2. **Add Coffee:** Insert the filter funnel back into the lower chamber. Fill the filter with ground coffee, leveling it gently without pressing.
3. **Assemble:** Screw the upper chamber firmly onto the lower chamber, ensuring a tight seal.
4. **Place on Base:** Place the assembled Moka pot onto the left heating plate of the main base unit.
5. **Start Brewing:** Press the Moka pot button (usually indicated by a coffee cup icon) on the base. The indicator light will illuminate. The Moka pot will automatically shut off once brewing is complete and keep the coffee warm for 30 minutes.

Figure 3: Electric Moka Pot in operation

### 5.2. Milk Frother Operation

1. **Add Milk:** Pour cold milk into the milk frother jug. Do not exceed the maximum fill line indicated inside the jug.

2. **Place on Base:** Place the milk frother jug onto the right heating plate of the main base unit.
3. **Select Function:**
  - For **hot frothed milk**, press the red button (often with a frothing icon).
  - For **cold frothed milk**, press the blue button (often with a snowflake icon).
4. **Frothing:** The frother will automatically stop when the milk reaches the desired consistency and temperature.

Figure 4: Milk Frother in use

### 5.3. Kettle Function Operation

1. **Add Water:** Pour cold water into the milk frother jug. Do not exceed the maximum fill line.
2. **Place on Base:** Place the jug onto the right heating plate of the main base unit.
3. **Select Temperature:**
  - For **80°C water** (e.g., for green tea), press the appropriate button (often with a tea cup icon).
  - For **100°C boiling water** (e.g., for black tea or instant beverages), press the kettle button (often with a boiling water icon).
4. **Heating:** The kettle will automatically turn off once the selected temperature is reached.

## 6. CLEANING AND MAINTENANCE

Regular cleaning ensures optimal performance and longevity of your Ariete 1344 Breakfast Station. Always unplug the appliance and allow it to cool completely before cleaning.

- **Moka Pot:** Disassemble the Moka pot. Wash all parts (lower chamber, filter funnel, upper chamber) with warm, soapy water. Rinse thoroughly and dry. Ensure no coffee grounds remain in the filter or valve.
- **Milk Frother / Kettle:** The interior of the jug has a non-stick surface, making it easy to clean. Wash with warm, soapy water and a soft sponge. Rinse well and dry. **Do not immerse the jug's electrical base in water.**
- **Main Base Unit:** Wipe the exterior of the base unit with a damp cloth. Do not use abrasive cleaners or immerse in water.
- **Descaling:** Depending on water hardness, periodic descaling may be necessary for the Moka pot and kettle. Refer to a suitable descaling solution's instructions for use with coffee makers and kettles.
- **Storage:** Store the clean and dry appliance in a cool, dry place.

**Important:** The Moka pot and milk frother/kettle are not dishwasher safe. Hand wash only to prevent damage to electrical components and finishes.

## 7. TROUBLESHOOTING

If you encounter issues with your Ariete 1344 Breakfast Station, please consult the following table before contacting customer support.

| Problem                                 | Possible Cause  | Solution   |
|---|---|--|
| Appliance does not turn on.             | Not plugged in, power outage, or faulty outlet.   | Ensure the power cord is securely plugged in. Check the power supply. Try a different outlet.  |
| Moka pot coffee is weak or not brewing. | Insufficient water, coffee too coarse, filter clogged, or Moka pot not sealed properly.           | Check water level. Use finer ground coffee. Clean the filter. Ensure the Moka pot is screwed on tightly.   |
| Milk frother not frothing milk.         | Incorrect milk type/temperature, insufficient milk, or frother attachment not properly installed. | Use cold, fresh milk (dairy or suitable plant-based). Ensure milk level is between MIN and MAX marks. Check if the frothing whisk is correctly placed. |
| Kettle not heating water.               | Insufficient water or jug not properly seated on the base.  | Ensure water level is above MIN mark. Verify the jug is correctly placed on the right heating plate.   |
