5. OPERATING INSTRUCTIONS

Once the EVF-TL1 adapter is installed, you can adjust the angle of your EVF to suit your shooting needs.

- **Horizontal Shooting:** For shooting horizontal landscapes, the EVF can be tilted from 0 degrees (straight ahead) up to 90 degrees (pointing upwards). This allows for comfortable viewing when shooting from low angles.
- **Portrait Shooting:** When shooting in the portrait orientation, the EVF can be adjusted from -45 degrees to +45 degrees. This provides flexibility for various vertical compositions.

To adjust the angle, gently hold the EVF unit and pivot it to the desired position. The adapter is designed to hold its position once set.

6. MAINTENANCE AND CARE

Proper care will ensure the longevity and optimal performance of your EVF-TL1 Tilt Adapter.

- **Cleaning:** Use a soft, dry cloth to wipe the adapter. For stubborn dirt, a slightly damp cloth can be used, followed by immediate drying. Avoid using strong solvents or abrasive cleaners.
- **Storage:** Store the adapter in a cool, dry place away from direct sunlight and extreme temperatures. If not in use for extended periods, consider detaching it from the camera body.
- **Handling:** Avoid excessive force when adjusting the tilt mechanism. Do not force the adapter beyond its specified angle limits.
