GSI Creos GNZ-WP05

GSI Creos WP05 Weathering Paste Mud Red Instruction Manual

Model: GNZ-WP05

INTRODUCTION

The GSI Creos WP05 Weathering Paste Mud Red is a specialized modeling material designed to create realistic mud and dirt effects on scale models, dioramas, and other hobby projects. This paste allows for a variety of expressive techniques, from subtle dirt accumulation to heavy mud stains, enhancing the realism of your creations.

SAFETY INFORMATION

WARNING: This product contains small parts which may be considered a choking hazard. Keep out of reach of small children. For users aged 12 years and up. Use in a well-ventilated area.

Always read and follow the instructions carefully. Avoid contact with skin and eyes. In case of contact, rinse immediately with plenty of water. If swallowed, seek medical advice immediately and show this container or label.

PRODUCT OVERVIEW

The WP05 Weathering Paste Mud Red is part of the Mr. Weathering Paste series, offering a matte finish and a gel-like consistency. It is ideal for replicating mud effects on military models (AFV), railway models, and creating realistic ground textures in dioramas. This paste can be used independently or in combination with other Mr. Weathering Paste colors and products.

Figure 2: Example of Mud Red with Wet Clear (sold separately) added and dried, demonstrating how additives can alter the final

PREPARATION

1. **Ensure a Clean Surface:** Before application, ensure the model surface is clean, dry, and free from dust, grease, or other contaminants.
2. **Stir the Paste:** Gently stir the weathering paste in its container to ensure a consistent texture and color.
3. **Dilution (Optional):** For thinner applications or different effects, the paste can be diluted with the dedicated Mr. Weathering Color Thinner (WCT101), sold separately. Start with small amounts of thinner and mix thoroughly until the desired consistency is achieved. Do not use other types of thinners unless specified, as they may react negatively with the paste.

APPLICATION INSTRUCTIONS

Apply the weathering paste using a brush, spatula, or other suitable modeling tools. The application method will depend on the desired effect.

- **For Heavy Mud Stains:** Apply the paste directly to the desired areas, building up layers to create depth and texture. Use a brush or spatula to sculpt the mud into realistic shapes.
- **For Splatter Effects:** Load a stiff brush with diluted paste and flick it onto the model for realistic mud splatters.
- **For Dirt Accumulation:** Apply a thin layer of paste and then use a dry brush or cotton swab to remove excess, leaving dirt in recesses and around details.
- **Layering:** This paste can be layered over other weathering products or paints once they are dry.

DRYING

The drying time for the weathering paste can vary depending on the thickness of the application, humidity, and temperature. Allow sufficient time for the paste to fully cure before handling or applying additional layers. Thicker applications will require longer drying times.

MAINTENANCE AND CLEANING

Clean brushes and tools immediately after use with Mr. Weathering Color Thinner (WCT101) or a suitable acrylic cleaner. Ensure the paste container is tightly sealed after each use to prevent drying out.

TROUBLESHOOTING

- **Paste is too thick:** Dilute with Mr. Weathering Color Thinner (WCT101) in small increments until desired consistency is reached.
- **Paste not adhering:** Ensure the surface is clean and dry. A primer layer may improve adhesion on some materials.
- **Uneven application:** Use a consistent amount of paste and apply with even strokes. For textured effects, vary application intentionally.

SPECIFICATIONS

Brand	GSI Creos
Model Name	WP05 Weathering Paste Mud Red, Mr. Hobby
Item Model Number	GNZ-WP05
Color	Red (Mud Red)
Finish Type	Matte
Item Form	Gel
Item Volume	40 Milliliters (0.3 Fl Oz)
Indoor/Outdoor Usage	Indoor
Recommended Age	12 years and up
Product Dimensions	2.75 x 4.25 x 2.25 inches
Item Weight	3.52 ounces
Date First Available	November 18, 2016
