3. SETUP

Follow these steps to set up your headphones:

- 1. Connect the Audio Cable:** Insert the 3.5 mm audio jack into the audio port of your device (e.g., smartphone, tablet, computer, gaming console). Ensure the connection is secure.
- 2. Adjust Headband:** Gently extend or retract the headband to fit comfortably over your head. The earcups should fully cover your ears without excessive pressure.
- 3. Position Microphone:** The in-line microphone is integrated into the cable. Position it appropriately for clear voice pickup during calls.

4. OPERATING INSTRUCTIONS

Using your eKids Hello Kitty Over-Ear Headphones is straightforward:

- Audio Playback:** Once connected, play audio from your device. Sound will be routed through the headphones.
- Volume Control:** Use the in-line volume control slider or buttons on the headphone cable to adjust the audio level. Alternatively, adjust the volume directly on your connected device.
- Making/Receiving Calls:** When connected to a compatible device, the in-line microphone allows you to make and receive calls. Refer to your device's instructions for call management functions (e.g., answering, ending calls) which may be controlled via the in-line remote if present, or directly on your device.

5. MAINTENANCE

Proper care will extend the life of your headphones:

- Cleaning:** Use a soft, dry cloth to wipe the exterior of the headphones. For ear cushions, a slightly damp cloth can be used, but ensure they are completely dry before use. Avoid harsh chemicals or abrasive cleaners.
- Storage:** When not in use, store the headphones in a clean, dry place away from extreme temperatures and direct sunlight. Avoid tangling the cable; utilize the retractable cable feature if available, or coil it loosely.
- Cable Care:** Do not pull on the cable forcefully when disconnecting from a device. Always grasp the plug itself. Avoid sharp bends or kinks in the cable to prevent internal damage.

6. TROUBLESHOOTING

If you encounter issues with your headphones, try these solutions:

- No Sound:**
 - Ensure the 3.5 mm audio jack is fully inserted into both the headphones and your device.
 - Check the volume level on both the headphones' in-line control and your connected device.
 - Test the headphones with a different audio source or device to rule out device-specific issues.
- Microphone Not Working:**
 - Verify that your device's microphone input settings are correctly configured to use the external microphone.
 - Ensure the audio jack is fully inserted, as a partial connection can sometimes disable the microphone.

- Test the microphone with a different application or device.

- **Sound Distortion:**

- Lower the volume on your device and headphones.
- Ensure the audio cable is not damaged or kinked.
- Try a different audio source or file.
