Duraflame Quick Start Firelighters (Model 04053)

Instruction Manual

INTRODUCTION

The Duraflame Quick Start Firelighters are designed to provide a fast, clean, and reliable method for igniting wood fires. These firelighters are suitable for use in various applications including indoor fireplaces, wood stoves, outdoor fire pits, and grills. Each firelighter is formulated to burn for up to 30 minutes, ensuring sufficient time to establish a robust fire.

This manual provides essential information regarding the safe handling, setup, and operation of your Duraflame Quick Start Firelighters.

SAFETY INFORMATION

Please read and understand all safety warnings before using Duraflame Quick Start Firelighters. Failure to follow these instructions may result in fire, injury, or property damage.

- **Risk of Fire:** Always exercise caution when starting fires.
- **Do Not Poke:** Avoid poking a burning firelighter, as flaming particles may stick to tools or cause burns.
- **No Volatiles:** Never add liquid firestarter, aerosol cans, or other volatile substances to any fire.
- **Children and Pets:** Never leave children or pets unattended near a fire. Store firelighters away from children and pets. Not suitable for human or animal consumption.
- **Fireplace Screen:** Always use a fireplace screen when using firelighters in a fireplace.
- **Extinguishing:** To extinguish a fire, use a dry chemical fire extinguisher, sand, or water.
- **Not for Cooking:** These firelighters are not intended for cooking purposes.

SETUP AND PREPARATION

Duraflame Quick Start Firelighters are designed for ease of use. Follow these steps to prepare for fire starting:

1. **Unpack:** Remove the desired number of firelighters from the packaging. Each block contains four firelighters that can be easily broken apart.
2. **Break Apart:** Gently break off one or more firelighters from the block as needed. Typically, one firelighter is sufficient for starting a standard wood fire.

OPERATING INSTRUCTIONS

Follow these steps to effectively start a wood fire using Duraflame Quick Start Firelighters:

1. **Prepare Fire Area:** Ensure your fireplace, wood stove, fire pit, or grill is clean and ready for a fire. Place a few pieces of kindling or small logs in the desired configuration.
2. **Position Firelighter:** Place one Duraflame Quick Start Firelighter directly under the kindling or small logs. Ensure there is good airflow around the firelighter and the wood.
3. **Ignite:** Using a long match or utility lighter, light the edge of the firelighter. It will ignite quickly and produce a consistent flame.
4. **Add Wood:** Once the kindling or small logs have caught fire and are burning steadily, gradually add larger pieces of wood as needed. Do not smother the flame.

MAINTENANCE

Duraflame Quick Start Firelighters are single-use products and do not require any maintenance. Store unused firelighters in a cool, dry place, away from direct sunlight and heat sources, and out of reach of children and pets.

TROUBLESHOOTING

If you encounter difficulty starting a fire:

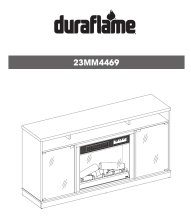

- **Ensure Airflow:** Verify that there is adequate airflow around the firelighter and the kindling/logs. Poor airflow can hinder ignition and burning.
- **Dry Wood:** Ensure the wood you are attempting to light is dry. Damp wood is significantly harder to ignite.
- **Additional Firelighter:** If necessary, use a second firelighter to provide more heat and a longer burn time for stubborn fires.
- **Proper Placement:** Make sure the firelighter is placed directly under the kindling or smallest pieces of wood to maximize heat transfer.

SPECIFICATIONS

Feature	Specification
Brand	Duraflame
Model Number	04053
Item Weight	11.77 pounds (for 40-count case)
Product Dimensions	9.25 x 7.75 x 7.25 inches (for 40-count case)
Material	Wood-based
Burn Time	Up to 30 minutes per firelighter
UPC	608436888119
