

Theben 1020943

Theben theLeda 1020943 LED Floodlight with Motion Detector User Manual

Model: 1020943

1. INTRODUCTION

This user manual provides essential information for the safe and efficient installation, operation, and maintenance of your Theben theLeda 1020943 LED Floodlight with Motion Detector. Please read these instructions carefully before installation and retain them for future reference.

2. SAFETY INFORMATION

Always observe the following safety precautions to prevent personal injury or damage to the product:

- **Electrical Installation:** Installation must be carried out by a qualified electrician in accordance with national wiring regulations and local safety standards.
- **Power Disconnection:** Ensure the main power supply is switched off before commencing any installation, maintenance, or repair work.
- **Outdoor Use:** This product is designed for outdoor use with an IP55 protection rating. Ensure all connections are properly sealed to maintain this rating.
- **Mounting:** Mount the floodlight securely on a stable surface. Do not install near flammable materials.
- **Temperature:** Do not operate the device outside its specified temperature range.

3. PRODUCT FEATURES

The Theben theLeda 1020943 LED Floodlight offers advanced functionality for outdoor lighting:

- **Integrated Motion Detector:** Equipped with a passive infrared (PIR) sensor for precise and automatic lighting control.
- **Wide Detection Area:** The motion detector covers a 12-meter range with a 180° detection angle, ideal for entrances, patios, and gardens.
- **Adjustable LED Floodlight:** The LED panels can be flexibly oriented, pivoting 30° backward and 60° downward to direct light where needed.

- **Optimal Cooling:** A high-quality die-cast aluminum back ensures efficient cooling for the high-performance LEDs, extending product lifespan.
- **Master Functionality:** Allows for easy connection and synchronization of multiple TheLeda P units for comprehensive lighting coverage.
- **User-Friendly Adjustments:** Settings such as light duration and sensitivity can be adjusted via controls located under the front panel or with optional Theben remote controls (theSenda S or theSenda P, sold separately).
- **Durable Outdoor Design:** IP55 protection class ensures safe and reliable operation in various outdoor conditions, suitable for security, entrance, and garden lighting.

4. INSTALLATION GUIDE

Follow these steps for proper installation. It is recommended that installation be performed by a qualified professional.

1. **Choose Location:** Select a suitable outdoor location, such as an entrance, patio, or garden area, ensuring the desired detection range and angle can be achieved. Avoid placing near heat sources or objects that might cause false triggers.
2. **Prepare Wiring:** Turn off the main power supply at the circuit breaker. Run appropriate electrical wiring to the chosen installation point.
3. **Mounting:** Securely attach the floodlight to the wall or mounting surface using appropriate screws and anchors. Ensure the mounting is stable and can support the weight of the unit.
4. **Electrical Connection:** Connect the electrical wires (Live, Neutral, Earth) to the corresponding terminals inside the floodlight's wiring compartment. Ensure all connections are tight and properly insulated.
5. **Seal Connections:** Ensure all cable entries and the wiring compartment cover are properly sealed to maintain the IP55 weather protection.
6. **Adjust Floodlight Angle:** Once mounted, adjust the LED panels to direct the light beam as desired. The panels can pivot 30° backward and 60° downward.
7. **Restore Power:** Once installation is complete and all connections are secure, restore power at the circuit breaker.

Figure 1: Front view of the Theben theLeda 1020943 LED Floodlight.

Figure 2: The Theben theLeda 1020943 LED Floodlight installed and illuminated on an outdoor wall.

5. OPERATION AND SETTINGS

The theLeda 1020943 offers various adjustable settings to customize its operation:

- **Accessing Controls:** The adjustment controls are located under the front panel of the floodlight. Carefully

open the panel to access them.

- **Time Duration:** Adjust the length of time the light remains on after motion is detected.
- **Light Sensitivity (Lux):** Set the ambient light level at which the motion detector becomes active. This prevents the light from turning on during daylight hours.
- **Detection Range:** Fine-tune the motion sensor's detection range to suit your specific area.
- **Master/Slave Function:** If multiple units are installed, configure them for synchronized operation using the Master function. Refer to the detailed wiring diagram for multi-unit setup.
- **Remote Control (Optional):** For convenient adjustment, the Theben theSenda S or theSenda P remote controls (not included) can be used. Refer to the remote control's manual for pairing and operation instructions.

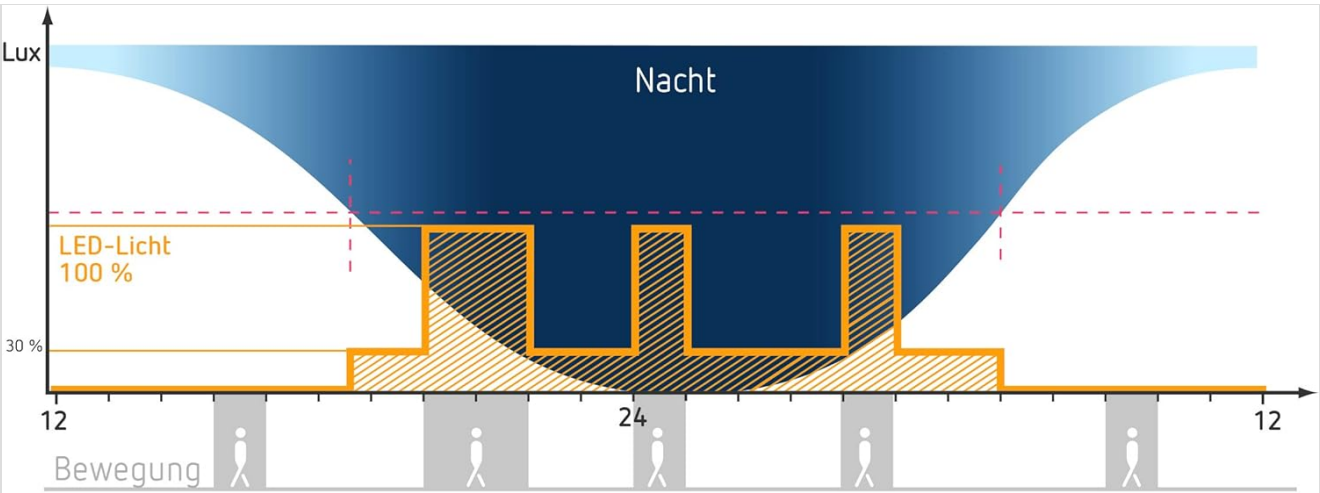

Figure 3: Operational diagram showing light activation (LED-Licht 100%) based on ambient light (Lux) and detected movement (Bewegung) over a 24-hour cycle (Nacht indicates night).

6. MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your floodlight:

- **Cleaning:** Periodically clean the floodlight's surface and the motion sensor lens with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- **Inspection:** Regularly check for any signs of damage to the housing, wiring, or mounting. Address any issues promptly.
- **No User-Serviceable Parts:** The LED light source is not user-replaceable. Do not attempt to open or repair the internal components. Contact qualified service personnel for any repairs.

7. TROUBLESHOOTING

If you encounter issues with your theLeda 1020943 floodlight, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Light does not turn on.	No power supply; Lux setting too high; Motion sensor obstructed or faulty.	Check power connection and circuit breaker; Adjust Lux setting; Clear obstructions from sensor; Test sensor functionality.
Light stays on continuously.	Time duration setting too long; Constant motion in detection area; Faulty sensor.	Adjust time duration setting; Reduce detection range or reposition; Contact support if sensor is faulty.

Problem	Possible Cause	Solution
Light turns on without apparent motion.	Detection area too wide; Environmental factors (e.g., moving branches, small animals, heat sources).	Adjust detection range; Reposition floodlight to avoid false triggers; Use masking clips if available.
Detection range is too short.	Incorrect mounting height; Obstructions; Sensitivity setting too low.	Verify mounting height as per instructions; Remove obstructions; Increase sensitivity setting.

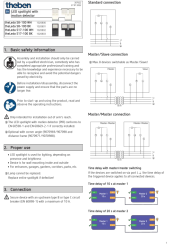

8. TECHNICAL SPECIFICATIONS

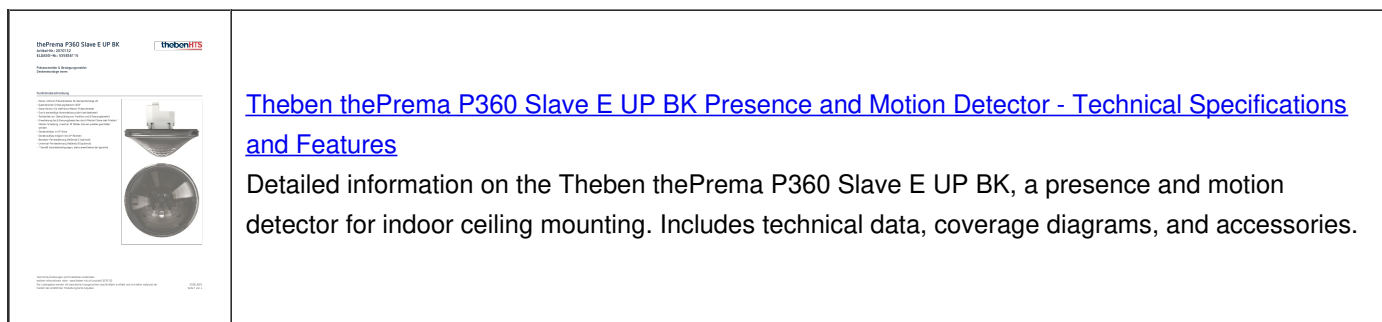

Feature	Specification
Brand	Theben
Model Number	1020943
Product Dimensions (L x W x H)	13 x 18 x 22 cm
Weight	1.06 kg (2.34 lbs)
Color	White
Material	Plastic
Power Type	Wired
Power Consumption	20 Watts
Bulb Type	LED
Electrical Plug Type	Transversal (t)
Protection Class	IP55
Motion Sensor Range	Max 12 Meters
Motion Sensor Angle	180°
Mounting Type	Transversal (t)
Recommended Uses	Residential security, automation, commercial security
Batteries Required	No

9. WARRANTY AND SUPPORT

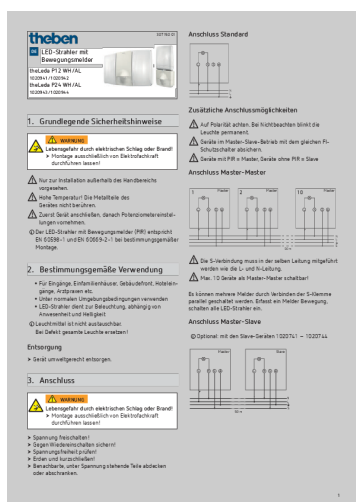

Information regarding product warranty and customer support was not provided in the source material. Please refer to your purchase documentation or contact Theben customer service for details on warranty coverage and technical assistance.

 Projecteur à LED avec détecteur de mouvement	
theLeda P12 WH/AL 1020941/1020942 theLeda P24 WH/AL 1020943/1020944	
1. Consignes de sécurité fondamentales	5
⚠️ AVERTISSEMENT Danger de mort, risque d'électrocution ou d'incendie ! Seul un électricien spécialisé est habilité à procéder au montage ! Ne pas toucher les parties métalliques de l'appareil. Raccorder tout d'abord l'appareil, puis effectuer les réglages du détecteur de mouvement. Le projecteur à LED avec détecteur de mouvement (P12) dépend aux exigences des normes EN 60598-1 et EN 60598-2-1 avant de procéder au montage.	Possibilités de raccordement supplémentaires Respecter la polarité. En cas de non-respect, le signal émis est en continu. Respecter les appas en mode Maître-Esclave avec le signal émis par d'autres détecteurs. Respecter avec BP+ Maître, appas sans BP+ Esclave. Raccordement maître-maître La liaison 5 doit être sur la même ligne que les câbles 1, 2, 3, 4. Max. 10 appareils interconnectables comme maître maître 1. Il est possible de brancher plusieurs détecteurs en parallèle en mode de liaison 5. Si un détecteur détecte un mouvement, tous les projecteurs à LED s'allument. Raccordement maître-esclave En liaison avec les appareils esclaves 1020941 - 1020944.
2. Usage conforme	5
Ne pas installer les détecteurs individuellement, les détecteurs de liaison, les esclaves P12/24, les câbles métalliques, etc. À utiliser dans des conditions ambiantes normales. Le projecteur à LED sans détecteur de mouvement de la présence et de la luminosité. Le signal émis doit être compliqué. En cas de défaut, remplacer tout le luminaire !	
Élimination	
Procéder à l'élimination de l'appareil conformément aux directives de protection de l'environnement.	
3. Raccordement	6
⚠️ AVERTISSEMENT Danger de mort, risque d'électrocution ou d'incendie ! Seul un électricien spécialisé est habilité à procéder au montage ! Couper la tension ! Protéger contre toute remise en marche ! Vérifier l'absence de tension ! Mettre à la terre et équilibrer. Raccorder ou protéger les câbles dans les conditions à garantir.
