## 7. TROUBLESHOOTING

If you encounter issues with your waffle maker, please consult the following common problems and solutions:

Problem	Possible Cause	Solution
Waffle maker does not heat up.	Not plugged in; power switch off; faulty outlet.	Ensure the appliance is properly plugged in and the power switch is on. Check the electrical outlet with another appliance.
Waffles are not browning evenly.	Insufficient preheating; uneven batter distribution; thermostat setting too low.	Allow the appliance to fully preheat until the indicator light signals readiness. Ensure batter is spread evenly. Adjust the thermostat to a higher setting. Ensure the rotating handle is used to flip the plates during cooking.
Waffles stick to the plates.	Plates not properly seasoned; old or incorrect batter recipe; plates not clean.	Ensure plates are clean and lightly greased before use (if not non-stick). Use a fresh, appropriate waffle batter recipe. Clean plates thoroughly after each use.

If the problem persists, please contact customer support.
