

GETINLIGHT IN-0210-1-SN

Getinlight 12-inch 3 Color Levels LED Under Cabinet Lighting

Model: IN-0210-1-SN | Brand: GETINLIGHT

PRODUCT OVERVIEW

The Getinlight IN-0210-1-SN LED Under Cabinet Lighting fixture offers versatile illumination for your kitchen or other indoor spaces. This unit features selectable color temperatures and dimmable functionality, providing adaptable lighting for various needs.

- **Easy Color Temperature Selection:** Choose from Warm White (2700K), Soft White (3000K), or Bright White (4000K) using a simple slide switch.
- **Flexible Installation:** Supports both hardwired and plugged-in setups. Hardware and cords for both methods are included. Up to 20 units can be connected to a single power supply.
- **Slim Profile:** Features a 1-inch slim profile for discreet installation under cabinets. Knock-out holes are provided for hardwiring (one knockout on 9-inch and 12-inch models).
- **Dimmable Compatibility:** Compatible with most wall dimmers for adjustable brightness. A Hi/Low switch is also included for non-dimming applications.
- **Safety & Efficiency:** ETL Listed, ENERGY STAR certified, and complies with Lighting Facts Label for reliable and energy-efficient performance.

INSTALLATION

Installation Options: Hardwired or Plugged-in

The Getinlight under cabinet light offers two primary installation methods: hardwired for a seamless, integrated look, or plugged-in for quick and easy setup. Both methods include necessary hardware.

EASY TO INSTALL

Hardwired or Plugged-In installations available

Connecting Multiple Units

You can link up to 20 units to a single power supply. Use the included linking cord or end-to-end connector to extend your lighting across multiple cabinets. This ensures uniform illumination without multiple power sources.

OPERATING INSTRUCTIONS

Color Temperature Selection

The fixture features a slide switch to select one of three color temperatures: Warm White (2700K), Soft White (3000K), or Bright White (4000K). Adjust this setting to match your preference or the ambiance of your room.

MAINTENANCE

To ensure optimal performance and longevity of your Getinlight LED Under Cabinet Lighting, follow these simple maintenance guidelines:

- **Cleaning:** Disconnect power before cleaning. Use a soft, dry cloth to wipe the fixture. Avoid abrasive cleaners, solvents, or polishes that could damage the finish or diffuser.
- **Bulb Replacement:** This fixture uses integrated LED chips that do not require replacement. If the light stops functioning, refer to the troubleshooting section or contact customer support.
- **Inspection:** Periodically check all connections and mounting screws to ensure they are secure.

TROUBLESHOOTING

If you encounter issues with your Getinlight LED Under Cabinet Lighting, consult the following common troubleshooting steps:

- **Light does not turn on:**
 - Ensure the power cord is securely plugged into an active outlet or that the hardwired connection is correctly made.
 - Check the wall switch or dimmer for power.
 - Verify the fixture's ON/OFF switch is in the 'ON' position.
- **Light flickers or dims unexpectedly:**
 - Ensure the dimmer switch is compatible with LED lighting.
 - Check for loose connections in the wiring or between linked fixtures.
 - Confirm that the total wattage of linked units does not exceed the maximum interconnected unit total (720 watts).
- **Incorrect color temperature:**
 - Adjust the color temperature slide switch on the fixture to your desired setting (2700K, 3000K, or 4000K).

If problems persist after following these steps, please contact customer support.

SPECIFICATIONS
