Vetericyn 1046

Vetericyn Plus Feline Wound Care Hydrogel Spray User Manual

Model: 1046

1. Introduction

The Vetericyn Plus Feline Wound Care Hydrogel Spray is designed to provide healing aid and protection for cats. This sprayable gel helps protect, moisturize, and relieve various topical skin issues and wounds in felines.

Image 1.1: Front view of the Vetericyn Plus Feline Hydrogel Spray bottle, showing the product name and key benefits.

Key Features:

- Healing aid and protection for cuts, wounds, sores, and irritations.
- Provides itch and pain relief for cats.
- Safe and effective, made with non-toxic hypochlorous technology.
- pH-balanced and non-irritating formula.
- Veterinarian recommended.
- Manufactured in the USA.

2. Safety Information

For animal use only. Keep out of reach of children. Discontinue use if irritation or systemic condition develops and contact your veterinarian. This product will not stain and contains no harsh chemicals or dyes. It is safe for use around the mouth, nose, ears, and eyes.

3. Preparation for Use

1. **Shake well** before each use to ensure proper mixture of the hydrogel.
2. Move any excess hair away from the affected wound area.
3. If necessary, gently clip hair around the wound to ensure direct application to the skin.

4. Operating Instructions

Follow these steps for effective application of Vetericyn Plus Feline Wound Care Hydrogel Spray:

1. For best results, first clean the affected area with Vetericyn Plus Feline Wound and Skin Care Liquid to ensure deep dermal cleansing and proper wound bed preparation.
2. Saturate the affected area thoroughly with the hydrogel spray.
3. If a dressing is required, saturate the dressing with Vetericyn Plus Hydrogel at each dressing change.
4. Repeat application 3-4 times per day, or as necessary, until the wound is healed.
5. No rinsing is necessary after application.
6. Faster healing is achieved when wounds are kept clean and moist.

5. Storage and Disposal

Storage:

- Store at room temperature.
- Do not allow to freeze.
- Do not use after the expiration date printed on the bottle.
- If the product no longer has a light bleach-like smell, it may have lost effectiveness and should be replaced.

Disposal:

- After use, rinse the nozzle with warm water to reduce the chance of hydrogel drying at the tip, then close the cap securely.
- No special disposal requirements are needed for the product itself. Dispose of the empty container according to local regulations.

6. Troubleshooting

If you observe any of the following, please take appropriate action:

- **Irritation or Systemic Condition:** If your cat develops irritation or any systemic condition after using the product, discontinue use immediately and contact your veterinarian.
- **Clogged Spray Nozzle:** If the spray nozzle becomes clogged, remove the cap and rinse the nozzle with warm water. If the issue persists, you may pour a small amount of the product into your hand for application.
- **Loss of Effectiveness:** If the product no longer has a faint bleach-like smell, it may have lost its effectiveness. It is recommended to replace the bottle with a new one.
