7. TROUBLESHOOTING

- **Food Sticking:** Ensure the grate is adequately preheated and lightly oiled before placing food. Avoid turning food too early; allow it to sear and release naturally.
- **Uneven Cooking:** Check that the heat source is evenly distributed beneath the grate. Rotate the grate or reposition food as needed.
- **Rust Spots:** While made of stainless steel, prolonged exposure to moisture or harsh chemicals can cause surface discoloration. Ensure the grate is thoroughly dried after cleaning and stored in a dry environment. Minor spots can often be removed with a stainless steel cleaner.
