HARDWARE MOUNTED

Hardware mounted gates are fixed into place and are great for doorways, hallways and stairs.

RETRACTABLE

CONVERTA® PLAY-PEN GATE

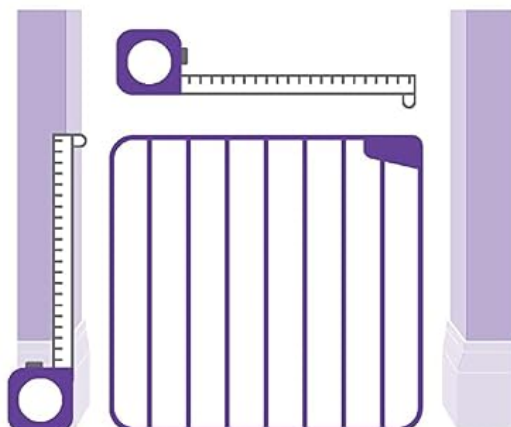

Converta® play-pen gates can be used as Hardware mounted barriers for extra-wide openings to provide restricted access to areas you want blocked off. These can also be converted to a play-pens to help provide a secure baby play space.

Locations

SETUP AND INSTALLATION

The Newport Adapta Gate is a hardware-mounted gate, requiring secure attachment to walls or sturdy surfaces. Proper installation is critical for safety.

1. Measure Your Opening

Measure the width of the opening where you intend to install the gate. The gate accommodates openings from 33.5 inches to 79 inches. Ensure the area is clear of obstructions.

2. Position the Gate

Determine the desired configuration of the three hinged panels to best fit your straight, angled, or irregular opening. For stair use, position the gate at the very top or bottom step.

3. Mount the Brackets

Using the provided hardware, securely attach the wall mounting brackets to the wall or banister posts. Ensure the brackets are level and at the correct height. Lower brackets can be adjusted to accommodate baseboards. It is recommended to drill pilot holes before inserting screws.

4. Attach the Gate

Once the brackets are secure, attach the gate panels to the brackets. Ensure all connections are tight and the gate swings freely without obstruction. Verify the EZY-Check indicator functions correctly upon closure.
