Assembly Instructions (Setup)

Follow the included instruction diagram carefully. Due to the micro size of nanoblocks, precision and patience are key.

1. **Preparation:** Clear a well-lit workspace. Sort blocks by color and size if desired, though the small number of pieces may not require extensive sorting.
2. **Understand the Diagram:** Study the instruction diagram thoroughly before beginning. Each step typically shows the addition of a few blocks to the previous layer.
3. **Layer by Layer Construction:** Begin with the base of the birthday cake. Build upwards, layer by layer, ensuring each block is firmly connected to the adjacent blocks.
4. **Detailing:** Pay close attention to the placement of decorative elements such as the white ribbons and candles as indicated in the diagram.
5. **Verification:** After completing each major section, compare your progress with the diagram to ensure accuracy.

Care and Maintenance

- **Cleaning:** To clean the assembled model, gently dust with a soft brush or a can of compressed air. Avoid using water or harsh cleaning agents.
- **Storage:** Store the model in a cool, dry place away from direct sunlight to prevent discoloration or material degradation.
- **Disassembly:** If disassembling, do so carefully to avoid damaging the blocks. Store loose blocks in a secure container.

Troubleshooting

- **Missing Pieces:** Carefully check the packaging and surrounding area. Due to their small size, pieces can be easily overlooked. If a piece is genuinely missing, contact KAWADA customer support.
- **Difficulty Connecting Blocks:** Ensure blocks are aligned correctly. Apply gentle, even pressure. Avoid forcing blocks, as this can cause damage.

- **Model Instability:** Re-check previous steps in the instruction diagram to ensure all blocks are correctly placed and firmly connected. A loose connection can affect overall stability.
