sinbo SCM 2928

Sinbo SCM 2928 Electric Turkish Coffee Maker User Manual

Model: SCM 2928 | Brand: Sinbo

INTRODUCTION

Thank you for choosing the Sinbo SCM 2928 Electric Turkish Coffee Maker. This appliance is designed to simplify the traditional process of making Turkish coffee, allowing you to prepare up to 5 demitasse cups at once. Its compact design and user-friendly features make it an ideal addition to any kitchen. Please read this manual carefully before first use to ensure safe and optimal operation.

IMPORTANT SAFETY INFORMATION

- Always ensure the appliance is unplugged before cleaning or when not in use.
- Do not immerse the main unit or power cord in water or any other liquid.
- Keep out of reach of children. This appliance is not intended for use by persons with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction.
- Use only on a stable, flat, heat-resistant surface.
- The appliance features a double protection system against overheating. If the unit overheats, it will automatically shut off. Allow it to cool down before attempting to use it again.
- This product operates on 230V~ 50 Hz and comes with an EU plug.**US & CA buyers should use a voltage converter to operate this machine safely.** Using it without a proper voltage converter may damage the appliance and void the warranty.
- Do not operate the appliance if the cord or plug is damaged, or if the appliance malfunctions or has been damaged in any manner.
- Avoid touching hot surfaces. Use the handle.
- Do not fill above the maximum fill line (0.4 lt capacity, approximately 5 demitasse cups).

PRODUCT OVERVIEW

Familiarize yourself with the components of your Sinbo Electric Turkish Coffee Maker.

Figure 1: Front view of the Sinbo SCM 2928 Electric Turkish Coffee Maker, showing the pot filled with coffee and the handle with the on/off switch.

- **Coffee Pot:** The main vessel for brewing coffee.
- **Handle:** Ergonomically designed for safe handling.
- **On/Off Switch:** Located on the handle for easy operation.
- **Power Base:** The base unit that connects to the power outlet.
- **Heating Element:** Integrated at the bottom of the pot for efficient heating.

SETUP

Before using your coffee maker for the first time, follow these steps:

1. Unpack the appliance and remove all packaging materials.
2. Wipe the exterior of the coffee pot with a damp cloth. Do not immerse the pot or base in water.
3. Rinse the interior of the coffee pot with clean water and dry thoroughly.
4. Place the appliance on a stable, flat, and heat-resistant surface near a suitable power outlet.
5. Ensure the voltage of your power supply matches the appliance's requirements (230V~ 50 Hz). If you are in the US or Canada, use a compatible voltage converter.

Figure 2: The coffee maker showing its power cord and EU plug. A voltage converter is required for use in regions with 110-120V power outlets.

OPERATING INSTRUCTIONS

Follow these steps to prepare delicious Turkish coffee:

1. **Measure Water:** Fill the appliance with cold water according to the number of people you are making coffee for (maximum 5 demitasse cups). The total capacity is 0.4 liters.
2. **Add Ingredients:** For medium-sugar coffee, add 1 coffee cup of water, 1 tablet of sugar, and a heaping full scale of Turkish coffee grounds. Adjust sugar and coffee amounts to your taste for different strengths and sweetness levels.
3. **Power On:** Plug your appliance into a suitable power outlet (using a voltage converter if necessary) and turn it on using the on/off button on the handle.
4. **Stir:** While the coffee is heating, mix the coffee a few times using a teaspoon to ensure all ingredients are well combined.
5. **First Rise (for foam):** When the coffee begins to rise slightly and foam appears on the surface, turn the appliance off. Carefully pour a small amount of the foamy coffee into each serving cup. This creates the desired foam layer.
6. **Second Rise (for remaining coffee):** Turn the appliance on again. Allow the coffee to rise once more.
7. **Serve:** Once the coffee rises again, pour the remaining coffee into the cups, distributing it evenly.
8. **Enjoy:** Your Turkish coffee is now ready to be served.

MAINTENANCE AND CLEANING

Proper maintenance ensures the longevity and optimal performance of your coffee maker. The appliance is designed for easy cleaning.

- **After Each Use:** Unplug the appliance and allow it to cool completely before cleaning.
- **Cleaning the Interior:** Rinse the inside of the coffee pot with warm water. For stubborn residues, use a soft sponge and a mild dish soap. Rinse thoroughly to remove all soap residue.
- **Cleaning the Exterior:** Wipe the exterior of the pot and handle with a damp cloth. Do not use abrasive cleaners or scouring pads, as they may scratch the surface.
- **Do Not Immerse:** Never immerse the coffee pot or its electrical base in water or any other liquid.
- **Drying:** Ensure all parts are completely dry before storing or next use.
- **Storage:** Store the appliance in a cool, dry place.

TROUBLESHOOTING

If you encounter any issues with your Sinbo Electric Turkish Coffee Maker, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Appliance does not turn on.	Not plugged in correctly; Power outlet malfunction; Overheating protection activated; Incorrect voltage.	Ensure the plug is fully inserted. Test the outlet with another device. Allow the unit to cool down for 15-20 minutes. Verify you are using a voltage converter if required for your region.
Coffee is not frothing properly.	Incorrect coffee-to-water ratio; Coffee not stirred sufficiently; Appliance turned off too late.	Adjust the amount of coffee grounds. Stir the coffee thoroughly during heating. Turn off the appliance as soon as foam appears.
Coffee overflows.	Overfilled; Not turned off in time.	Do not exceed the 0.4 liter maximum fill line. Monitor the coffee closely and turn off the appliance immediately when it rises.
Unusual smell or smoke.	First use (normal); Overheating; Internal fault.	A slight smell on first use is normal. Unplug immediately and allow to cool. If problem persists, discontinue use and contact customer service.
