### Separett 1255-01

# Separett Villa Composting Toilet User Manual

Brand: Separett | Model: 1255-01

## INTRODUCTION

The Separett Villa is a waterless, urine-diverting composting toilet designed for homes, cabins, RVs, and off-grid properties. It offers a hygienic and environmentally friendly sanitation solution by separating liquid and solid waste, minimizing odors and simplifying waste management. This manual provides detailed instructions for the setup, operation, and maintenance of your Separett Villa composting toilet.

## SAFETY INFORMATION

Please read all instructions carefully before installation and use. Failure to follow these guidelines may result in property damage or injury.

- Ensure proper ventilation as specified in the installation section to prevent odor buildup and ensure efficient operation.
- Always disconnect power to the fan before performing any maintenance or cleaning.
- Use appropriate personal protective equipment (PPE) when handling waste or cleaning the unit.
- Verify local regulations regarding composting toilets and waste disposal before installation and use.
- Keep out of reach of children and pets.

## PRODUCT OVERVIEW

The Separett Villa composting toilet is designed for ease of use and maintenance. Key components include the main toilet unit, a urine diversion system, a solid waste container, and a ventilation fan.

Top-down view of the Separett Villa with the lid open, revealing the internal solid waste container and the blue urine diversion system.

## SETUP

### Unboxing and Component Identification

Upon receiving your Separett Villa, carefully unbox all components. The package includes the main toilet unit, a solid waste container with lid, urine drain hose, compostable waste bags, a parts kit (including mounting brackets, screws, Allen wrench, and bio-drain tablet sample), and various vent pipe components. A template for wall cutouts is also provided.

Video: Separett Villa 9215 AC/DC Unboxing. This video demonstrates the unboxing process and identifies all included components, such as the toilet unit, solid waste container, urine drain hose, and various installation parts.

### Installation

The Separett Villa is designed for easy installation. It requires two openings in the wall for the urine drain and ventilation pipe. The included template assists in marking the precise locations for these cutouts. The ventilation system uses 3-inch US Schedule 40 piping for compatibility and efficient odor removal. Ensure all connections are sealed with silicone for an airtight fit.

### OPERATING INSTRUCTIONS

For optimal performance and hygiene, proper usage of the Separett Villa is crucial. Always ensure users are seated

to effectively separate liquid and solid waste.

Video: Use of compost toilet Separett Villa. This video demonstrates the correct way to use the Separett Villa, emphasizing the importance of sitting down for proper waste separation.

- **Urine Diversion:** The front part of the bowl collects urine, which is directed through a hose to an external container or greywater system.
- **Solid Waste:** Solid waste falls into a compostable bag within the internal container. A rotating screen covers the solid waste when the toilet is not in use, minimizing odors.
- **Ventilation:** The continuous low-power fan draws air from the bowl, ensuring a completely odor-free experience inside the bathroom.
- **Toilet Paper:** Toilet paper can be placed in the solid waste container.

## Maintenance

Regular maintenance ensures the longevity and hygienic operation of your Separett Villa.

Video: Cleaning and maintenance of compost toilet Separett Villa. This video provides a step-by-step guide on how to clean and maintain your composting toilet, including emptying the containers and cleaning surfaces.

- **Emptying Solid Waste:** The solid waste container, lined with a compostable bag, should be emptied when full. Frequency depends on usage (e.g., 2-3 weeks for one person full-time). The bag can be composted or disposed of according to local regulations.
- **Urine Container:** The external urine container should be emptied regularly. To prevent odor and buildup, pour white vinegar down the urine drain after each use.
- **Cleaning:** Clean the toilet bowl and surfaces with a mild, non-abrasive cleaner. Avoid harsh chemicals that could damage the plastic or interfere with the composting process.
- **Ventilation Screen:** Periodically check and clean the insect screen in the vent cap to ensure proper airflow.
- **Bio-Drain Tablets:** Use bio-drain tablets (sample included) as needed to help maintain the urine drain and prevent blockages.

## Troubleshooting

Here are some common issues and their solutions:

Problem	Possible Cause	Solution
Odor in bathroom	Insufficient ventilation; improper waste separation; full solid waste container.	Ensure fan is running; always sit down during use; empty solid waste container; check vent pipe for obstructions.
Urine drain blockage	Mineral buildup in the urine hose.	Pour white vinegar down the drain regularly; use bio-drain tablets; disconnect and clean the hose if severely blocked.
Fan not working	Power supply issue; fan motor failure.	Check power connection and adapter; contact customer support if fan is faulty.

## Specifications

Feature	Detail
Model Number	1255-01
Color	White

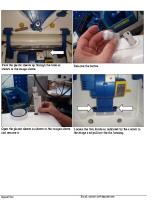

Feature	Detail
Product Dimensions	26.5"D x 18"W x 21.3"H
Item Weight	34 Pounds
Installation Type	Wall Mounted (with optional floor mounting)
Material	Polyvinyl Chloride (Seat)
Ventilation Pipe Compatibility	3-inch US Schedule 40 PVC

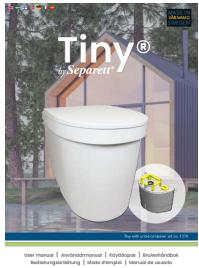

## WARRANTY AND SUPPORT

Separrett products are built with quality materials and user-friendly design, backed by 50 years of experience in developing waterless toilet systems. For specific warranty details or technical support, please visit the official Separrett website or contact their customer service directly.
