Toyotomi Tipo F

Toyotomi Zibro Type F Original Stove Wick Instruction Manual

For Models: RS-22, RS-221, RS-24, RS-291, RS-30, RC-270, R-125, R-41X, R-20E, R-21E, R-14, R-252TC, R-282C, R-222C, R-251C, R-257, R-253, R-25X, R-125, R-135C, R-55C, R-59C, R-27C, R-44C, R-30C, R-15C, R-16C, R-17, R-19, R-44, R-55, R-56, R-27

1. PRODUCT OVERVIEW

The Toyotomi Zibro Type F Original Stove Wick is a genuine replacement component designed for specific Zibro fuel-powered stoves. Manufactured by Toyotomi, a leading producer of heating solutions since 1949, this wick ensures optimal performance, efficient fuel combustion, and extended stove life. Using an original wick is crucial for maintaining the safety and efficiency of your Zibro heater.

2. COMPATIBLE STOVE MODELS

This Type F wick is specifically designed for the following Zibro stove models:

- RS-22, RS-221, RS-24, RS-291, RS-30
- RC-270, R-125, R-41X, R-20E, R-21E, R-14
- R-252TC, R-282C, R-222C, R-251C, R-257, R-253
- R-25X, R-125, R-135C, R-55C, R-59C
- R-27C, R-44C, R-30C, R-15C, R-16C, R-17, R-19, R-44, R-55, R-56, R-27

Image 2.1: The Zibro Type F wick displayed alongside various compatible Zibro and Toyotomi stove models, illustrating its broad application.

3. SETUP AND INSTALLATION (WICK REPLACEMENT)

Safety Warning: Always ensure your stove is completely cool and unplugged (if applicable) before attempting any maintenance or wick replacement. Refer to your specific stove's manual for detailed safety precautions.

1. **Prepare the Stove:** Turn off the stove and allow it to cool down completely. Remove the fuel tank and any remaining fuel.
2. **Access the Wick Mechanism:** Depending on your stove model, you may need to remove the top cover, combustion chamber, or other components to access the wick assembly. Consult your stove's user manual for specific disassembly instructions.

3. **Remove the Old Wick:** Carefully detach the old wick from its holder. Note how it is seated to ensure correct installation of the new wick. Dispose of the old wick responsibly.
4. **Install the New Wick:** Place the new Toyotomi Zibro Type F wick into the wick holder. Ensure it is seated evenly and securely, following the specific guidance in your stove's manual. The wick should move freely up and down if it's a movable wick type.
5. **Reassemble the Stove:** Carefully reassemble all components in reverse order of disassembly. Ensure all parts are securely fastened.
6. **Allow Wick to Soak:** Refill the fuel tank with recommended fuel (see Section 4). Reinsert the tank and allow the new wick to soak in the fuel for at least 60 minutes before attempting to light the stove. This prevents premature wick damage.

4. OPERATING INSTRUCTIONS (WITH NEW WICK)

After installing the new wick and allowing it to soak, follow these guidelines for optimal operation:

- **Fuel Type:** Always use high-quality, clean paraffin or kerosene specifically designed for portable fuel stoves. Toyotomi recommends using their brand fuels (TOYOTOMI PLUS, PURE, PRIME, CLEAR) for best performance, low odor, and extended stove life.
- **Initial Burn:** For the first few uses, monitor the flame closely. The new wick may produce a slightly different flame pattern initially.
- **Ventilation:** Ensure adequate ventilation in the room where the stove is operating to prevent carbon monoxide buildup.
- **Flame Adjustment:** Adjust the wick height to achieve a stable, blue-tipped flame without excessive yellow or smoke.

5. WICK MAINTENANCE

Proper maintenance of your wick will ensure efficient heating and prolong its lifespan:

- **Regular Cleaning:** Periodically clean the top edge of the wick to remove any carbon buildup. This can often be done by burning the wick at its highest setting for a short period (known as 'dry burning' or 'wick cleaning cycle' – consult your stove manual).
- **Avoid Contaminants:** Only use clean, recommended fuel. Contaminated fuel can clog the wick and reduce its effectiveness.
- **Wick Rotation (if applicable):** Some stoves allow for wick rotation to expose fresh wick material. Refer to your stove's manual.
- **Replacement:** Replace the wick when it becomes too short to maintain a proper flame, is heavily carbonized, or shows signs of significant wear and tear.

6. TROUBLESHOOTING COMMON WICK ISSUES

Problem	Possible Cause	Solution
Stove difficult to light	Wick not fully saturated; wick too low; old/hardened wick	Allow more soaking time; adjust wick height; replace wick if old
Low or weak flame	Wick carbonized; incorrect fuel; wick too low	Perform wick cleaning; use correct fuel; adjust wick height

Problem	Possible Cause	Solution
Excessive smoke or odor	Poor quality fuel; wick too high; carbon buildup	Switch to high-quality fuel; adjust wick height; clean wick
Wick does not move freely	Carbon buildup on wick guide; wick jammed	Clean wick guide; ensure wick is installed correctly

7. PRODUCT SPECIFICATIONS

Specification	Detail
Manufacturer	Toyotomi
Part Number	Typ F
Item Weight	40 g
Product Dimensions	10 x 2 x 14 cm
Item Model Number	Tipo F
Size	F
Color	White/Brown
Style	Model F
Power Source Type	Fuel Powered
Item Package Quantity	1
Included Components	1 wick type "f"

8. WARRANTY AND CUSTOMER SUPPORT

For warranty information, specific technical support, or inquiries regarding your Toyotomi Zibro stove or wick, please refer to the documentation provided with your stove or visit the official Toyotomi website. You may also contact your local authorized Toyotomi dealer or customer service for assistance.

Always ensure you have your stove model number and the wick type (Type F) available when contacting support.
