## SETUP INSTRUCTIONS

Follow these steps to set up your HP Pro 6200 Mini Tower Desktop PC:

- 1. Unpack Components:** Carefully remove the computer, keyboard, mouse, and power cord from their packaging.
- 2. Connect Peripherals:**
  - Connect the keyboard and mouse to the available USB ports on the front or back of the computer.
  - Connect your monitor to the appropriate video output port (VGA or DisplayPort) on the back of the computer.
  - If using a wired network connection, connect an Ethernet cable to the RJ-45 port on the back.
  - If using Wi-Fi, ensure the included Wi-Fi adapter is connected (if applicable).
- 3. Power Connection:** Connect the power cord to the computer's power input and then to a grounded electrical outlet.
- 4. Initial Power On:** Press the power button on the front of the computer. The system will boot into Windows 10 Home.

## MAINTENANCE

---

Regular maintenance helps ensure the optimal performance and longevity of your desktop PC:

- **Software Updates:** Regularly check for and install Windows updates to ensure system security and performance.

- **Antivirus Scans:** Perform regular scans with your antivirus software to protect against malware.
- **Physical Cleaning:** Keep the computer's exterior clean. Use a soft, dry cloth to wipe dust. Ensure ventilation grilles are free from obstructions to prevent overheating.
- **Data Backup:** Periodically back up important data to an external drive or cloud storage to prevent data loss.

## TROUBLESHOOTING

If you encounter issues with your HP Pro 6200 Mini Tower PC, consider the following common solutions:

- **No Power:**
  - Verify the power cord is securely connected to both the computer and the electrical outlet.
  - Test the outlet with another device to ensure it is functional.
- **No Display:**
  - Ensure the monitor is powered on and the video cable is firmly connected to both the computer and the monitor.
  - Try a different video cable or monitor if available.
- **Peripheral Not Responding (Keyboard/Mouse):**
  - Check USB connections. Try plugging the device into a different USB port.
  - Restart the computer.
- **Slow Performance:**
  - Close unnecessary applications running in the background.
  - Ensure Windows and drivers are up to date.
  - Run a full system scan with antivirus software.
- **DVD-ROM Not Reading Discs:**
  - Ensure the disc is clean and free of scratches.
  - Try a different disc to rule out a faulty disc.
  - Check device manager for driver issues.
