

## Host 5168

# Host Wine Freeze Cooling Cups Instruction Manual

Model: 5168

## INTRODUCTION

The Host Wine Freeze Cooling Cups are innovative double-walled tumblers designed to keep your beverages at their optimal serving temperature for extended periods. Each cup features a proprietary cooling gel sealed within its insulated walls, which acts as a chiller when frozen or refrigerated. This design ensures your drinks remain cold without dilution from melting ice.

These cups are constructed from durable, BPA-free plastic, making them suitable for various settings, including outdoor use. An insulated silicone band provides a comfortable and secure grip, preventing your hands from getting cold while holding the chilled cup.

## SETUP INSTRUCTIONS

To activate the cooling properties of your Host Wine Freeze Cups, follow these steps:

1. **Prepare for Freezing:** For optimal performance and to prevent potential warping, place the Wine Freeze cups upside down in your freezer. This allows the internal cooling gel to evenly spread and freeze along the cup's walls.
2. **Freezing Times:**
  - For **white wine or rosé**, freeze the cups for at least two hours to achieve a temperature between 43 and 53 degrees Fahrenheit.
  - For **red wine**, refrigerate the cups for at least two hours to maintain a temperature between 58 and 60 degrees Fahrenheit.
3. **Ready for Use:** Once the gel is frozen or adequately chilled, remove the cups from the freezer

or refrigerator and they are ready to keep your beverage cold.

# Keeps ALL wines at the **PERFECT SERVING TEMPERATURE**

## **WHITE & ROSÉ WINE**

USE A FROZEN CUP

**Keeps wine ~45°F**

## **RED WINE**

USE A REFRIGERATED CUP

**Keeps wine ~60°F**

## **OPERATING INSTRUCTIONS**

Using your Host Wine Freeze Cooling Cups is straightforward:

1. **Select Your Beverage:** These cups are versatile and can be used for various cold drinks, including white wines, red wines, rosé, juice, soda, and tea.
2. **Pour Your Drink:** Once the cup is at the desired temperature (frozen for colder drinks, refrigerated for slightly cooler drinks), simply pour your beverage into the cup.
3. **Enjoy:** The cooling gel will maintain your drink's temperature for hours, allowing you to savor it without it becoming warm or diluted. The silicone band provides a comfortable hold.

## MAINTENANCE

Proper care will ensure the longevity of your Host Wine Freeze Cooling Cups:

- **Hand Wash Only:** These cups are designed for hand washing. Use mild soap and warm water.
- **Avoid Dishwashers:** Do not place the cups in a dishwasher, as high temperatures can damage the cooling gel and the cup's structure.
- **Drying:** Allow the cups to air dry completely before storing or placing them back in the freezer.

## Important Notes

To ensure the best experience and prevent damage to your Host Wine Freeze Cooling Cups:

- Always place the cups upside down in the freezer. This ensures the cooling gel spreads evenly and freezes properly, preventing the bottom from warping and maintaining the cup's stability.
- The cups are made of durable plastic, making them a safe alternative to glass in environments like pools or outdoor gatherings where breakage is a concern.
