

Salamander Designs FPSA/SC/GT

Salamander Designs FPS Series Secure Equipment Storage Cover

Model: FPSA/SC/GT - Instruction Manual

1. INTRODUCTION

This manual provides essential instructions for the proper setup, operation, and maintenance of your Salamander Designs FPS Series Secure Equipment Storage Cover, model FPSA/SC/GT. Please read this manual thoroughly before using the product to ensure safe and efficient operation and to prevent damage.

2. SAFETY INFORMATION

Observe the following safety precautions to prevent injury or damage to the product or equipment.

- Ensure the cover is installed on a stable and level surface to prevent tipping.
- Do not place excessive weight on the cover.
- Keep hands and fingers clear of moving parts when opening or closing the cover.
- Do not attempt to modify the cover or its locking mechanism. Unauthorized modifications can compromise security and void the warranty.
- Store keys for the locking mechanism in a secure location, away from unauthorized access.

3. SETUP

3.1 Unpacking

Carefully remove all components from the packaging. Inspect for any signs of damage during transit. Retain packaging materials for future transport or if return is necessary.

3.2 Placement and Installation

1. Choose a suitable location for the equipment that requires protection. Ensure the area is clean, dry, and level.

2. Position the FPS Series Secure Equipment Storage Cover over the equipment. Ensure it sits flush and securely.
3. Verify that the cover does not obstruct any necessary ventilation or access points for the equipment it is protecting.

Figure 1: The Salamander Designs FPS Series Secure Equipment Storage Cover. This image shows the cover's design and how it encloses equipment, highlighting its secure and professional appearance. The cover is designed to protect valuable equipment from unauthorized access and environmental factors.

4. OPERATING THE COVER

4.1 Opening the Cover

1. Insert the key into the lock mechanism located on the cover.
2. Turn the key to the unlocked position.
3. Gently lift or slide the cover as designed to access the enclosed equipment.

4.2 Closing and Securing the Cover

1. Carefully lower or slide the cover back into its closed position, ensuring it aligns properly.
2. Engage the locking mechanism.
3. Turn the key to the locked position and remove it. Verify that the cover is securely locked by attempting to open it without the key.

5. MAINTENANCE

5.1 Cleaning

To clean the cover, use a soft, damp cloth with a mild, non-abrasive cleaner. Avoid harsh chemicals or abrasive materials that could damage the finish. Dry thoroughly after cleaning.

5.2 Inspection

Periodically inspect the cover for any signs of wear, damage, or loose components. Check the locking mechanism for smooth operation. If any issues are found, refer to the Troubleshooting section or contact customer support.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Cover does not close properly.	Obstruction or misalignment.	Check for any objects blocking the cover's path. Ensure the cover is correctly aligned with its base or frame.
Lock mechanism is stiff or difficult to turn.	Dust/debris in the lock, or lack of lubrication.	Apply a small amount of graphite lubricant to the key and insert it into the lock, turning gently. Do not force the key.
Cover appears unstable.	Uneven surface or improper installation.	Ensure the equipment and cover are on a flat, stable surface. Re-check installation steps.

If you encounter issues not listed here or if solutions do not resolve the problem, please contact Salamander Designs customer support.
