Hot Wheels FML03

Hot Wheels Super Ultimate Garage Instruction Manual

Model: FML03

This manual provides essential information for the setup, operation, and maintenance of your Hot Wheels Super Ultimate Garage playset.

Important Safety Information

WARNING: CHOKING HAZARD - Small Parts. Not for children under 3 years.
Please ensure all small parts are kept away from young children to prevent choking. Adult supervision is recommended during assembly and play.

Setup

Before beginning play, ensure the Hot Wheels Super Ultimate Garage is properly assembled. This playset requires 4 D batteries (not included) for the motorized features. Carefully follow the assembly instructions provided in the packaging to connect all track pieces, levels, and features securely.
The playset includes 4 1:64 scale toy cars and 1 jet plane. All other cars are sold separately.

Operating Instructions

Car Storage

The Super Ultimate Garage is designed to store over 140 Hot Wheels cars across its six distinct levels. Cars can be parked on any of the designated parking spaces on each level.

Motorized Elevator (Rotator)

The playset features a continuous motorized elevator that can transport up to 23 cars at a time. To activate the elevator, locate the orange switch at the very bottom of the elevator tower and turn it on. Cars will roll onto the conveyor and be lifted to different levels as it rotates.
You can control which level the cars exit by opening or closing the small flaps located along the side of the rotator tower at each level's entrance.

Motorized Gorilla

A menacing gorilla figure is integrated into the elevator tower. As the rotator spins, the gorilla is lifted to the top. Once it reaches the top, it drops suddenly, adding an element of surprise to the play. If desired, the gorilla figure can be easily removed from the playset.

Jet Plane Penthouse

The top level of the garage features a penthouse landing pad with a massive jet plane. Cars can either drive directly into the jet plane for transport or pass underneath it by lifting the integrated flaps. This area serves as a starting point for races down the main ramp.

Car Wash

One of the garage levels includes a car wash feature. This section is manually operated; use your hand to spin the central platform to simulate washing the cars.

Side-by-Side Racetrack

The playset features a thrilling side-by-side racetrack that begins at the penthouse level. Cars are released manually down the spiral ramp. After racing down, they will line up again at the bottom, ready to be transported back up by the motorized elevator for continuous play.

Connection Points

The garage includes multiple connection points at its base and on various levels, allowing you to connect it to other Hot Wheels track sets (sold separately) to expand your customizable world of track and play.

Maintenance

To ensure the longevity and optimal performance of your Hot Wheels Super Ultimate Garage, regular maintenance is recommended:

- **Cleaning:** Wipe down the playset with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners.
- **Battery Replacement:** Replace the 4 D batteries when the motorized elevator's speed decreases or stops functioning. Ensure batteries are inserted with correct polarity.
- **Track Inspection:** Periodically check all track connections to ensure they are secure. Loose connections can affect car movement.
- **Elevator Mechanism:** Inspect the motorized elevator for any debris or obstructions that might cause jamming. Gently remove any foreign objects.

Troubleshooting

If you encounter issues with your Hot Wheels Super Ultimate Garage, consider the following:

- **Cars getting stuck in elevator:** This can occur occasionally. Check for any misaligned cars or obstructions within the spiral mechanism. Ensure the correct size of Hot Wheels cars are used, as some larger or unusually shaped cars may not fit properly.
- **Motorized gorilla not dropping:** Ensure the elevator is functioning correctly and the gorilla is properly attached. If the gorilla's dropping action is too loud or startling, it can be removed from the playset.
- **Playset separating:** Due to its large size, the playset may occasionally separate at its base if moved frequently. Realign and firmly press the sections back together.
- **Cars not racing smoothly:** Check the track for any dust or small debris. Ensure all track pieces are securely connected and there are no gaps or misalignments.

Specifications

Feature	Detail
Product Dimensions	57.87 x 27.56 x 42.13 inches
Item Weight	2.2 pounds
Item Model Number	FML03
Manufacturer Recommended Age	5 years and up
Batteries Required	4 D batteries
Storage Capacity	Over 140 cars
Country of Origin	Vietnam
