# kwmobile DIY Puzzle Lamp Shade XL - Assembly and Usage Manual

Model: 39225\_m000096

## INTRODUCTION

This manual provides detailed instructions for the assembly, operation, and maintenance of your kwmobile DIY Puzzle Lamp Shade, XL size. This product is designed as a self-assembly lamp shade composed of 30 interlocking pieces, allowing for various creative configurations. It is intended for use with a separate light cord and bulb (not included).

## PRODUCT COMPONENTS

- 30 individual polypropylene (PP) puzzle pieces
- Instruction manual (this document)

**Note:** A light cord and bulb are required for operation and are sold separately. The lamp shade is compatible with LED bulbs up to 40 watts.

## SETUP: ASSEMBLY INSTRUCTIONS

The kwmobile DIY Puzzle Lamp Shade requires assembly. The 30 pieces interlock to form various designs. Patience and careful attention to the interlocking mechanism are key for successful assembly.

### General Assembly Steps:

- 1. Unpack Components:** Carefully remove all 30 puzzle pieces from the packaging.
- 2. Identify Piece Orientation:** Each piece has specific tabs and slots. Observe how they are designed to interlock. Some pieces may have a front and back; ensure consistent orientation as you build.
- 3. Start with a Base Pattern:** Begin by interlocking a few pieces to establish a foundational pattern. The pieces fit together like a jigsaw puzzle.
- 4. Build Layer by Layer:** Continue adding pieces, ensuring each connection is secure. The structure will gradually take shape.

5. **Maintain Symmetry:** For a balanced design, try to build symmetrically. If you are aiming for a specific shape (e.g., spherical), ensure the curvature is consistent.
6. **Insert Light Cord:** Once the shade is mostly assembled, carefully integrate your light cord. The design allows for the cord to be threaded through an opening created by the interlocking pieces. You may need to slightly adjust a few pieces to accommodate the cord and bulb.
7. **Finalize Assembly:** Complete the remaining connections, ensuring the shade is stable and the light cord is securely positioned without putting undue stress on the plastic pieces.

**Tip:** Several online video tutorials are available that demonstrate various assembly patterns. Searching for "kwmobile puzzle lamp assembly" or "IQ puzzle lamp tutorial" may provide visual guidance if you encounter difficulties.

## OPERATING INSTRUCTIONS

Once assembled, the kwmobile DIY Puzzle Lamp Shade can be used in various settings.

- **Pendant Lamp:** Attach the assembled lamp shade to a compatible ceiling light cord and fixture. Ensure the fixture is

securely mounted and capable of supporting the shade's weight.

- **Table Lamp:** Place the assembled lamp shade over a suitable table lamp base with a compatible light bulb.

**Important:** Use only LED bulbs with a maximum wattage of 40 watts. Higher wattage incandescent bulbs can generate excessive heat, potentially damaging the polypropylene material of the lamp shade.

## MAINTENANCE

To ensure the longevity and appearance of your lamp shade, follow these maintenance guidelines:

- **Cleaning:** Dust the lamp shade regularly with a soft, dry cloth. For more thorough cleaning, gently wipe with a damp cloth and mild soap solution. Avoid abrasive cleaners or harsh chemicals, as these can damage the polypropylene material.
- **Disassembly:** If you need to disassemble the lamp shade for cleaning or storage, carefully unhook the interlocking pieces. Avoid forcing them, as this can cause breakage.
- **Storage:** Store disassembled pieces flat in a cool, dry place to prevent warping or damage.

## TROUBLESHOOTING

Issue	Possible Cause	Solution
Difficulty assembling the shade.	Incorrect piece orientation or pattern.	Review the assembly steps carefully. Ensure pieces are oriented correctly. Consider searching for online video tutorials (e.g., on YouTube) for visual guidance on various assembly patterns. Patience is essential.
Shade appears lopsided or unstable.	Uneven assembly or loose connections.	Carefully re-examine the connections. Ensure all pieces are fully interlocked and the structure is symmetrical. Disassemble and reassemble if necessary, paying close attention to even distribution of pieces.
Light bulb does not fit or is difficult to insert.	Opening for bulb is too small or misaligned.	The design requires the light cord and bulb to be integrated during or after assembly. Gently adjust the surrounding pieces to create sufficient space for the bulb without compromising the shade's structure. Ensure you are using a compatible bulb size.
Shade material feels brittle or discolored.	Exposure to excessive heat or prolonged outdoor use.	Ensure you are using an LED bulb with a maximum of 40 watts to prevent heat damage. This product is primarily designed for indoor use. Prolonged exposure to direct sunlight or extreme weather can affect material integrity.

## SPECIFICATIONS

Feature	Detail
Brand	kwmobile
Model Number	39225_m000096
Size	XL
Product Dimensions	Approximately 15.7"W x 15.7"H (40 cm diameter)
Color	White
Material	Polypropylene (PP)
Number of Pieces	30
Mounting Type	Ceiling Mount (with separate cord)
Max Wattage (Bulb)	40 watts (LED recommended)
Assembly Required	Yes

## WARRANTY INFORMATION

Specific warranty details for this product are not provided in the available information. Please refer to the retailer's return policy or contact kwmobile customer support for warranty inquiries.
