FELCO 7/22B

FELCO 7 Pruner Handle Replacement Instruction Manual

PRODUCT OVERVIEW

This manual provides detailed instructions for the installation and care of the FELCO 7 replacement handle grip. Designed specifically for the FELCO 7 hand pruner, this handle ensures a comfortable and secure grip for efficient pruning tasks. It is a direct replacement part, crafted for durability and ease of installation.

SAFETY INFORMATION

Always prioritize safety when handling tools and performing maintenance. Adhering to these guidelines will help prevent injury and ensure proper use of your FELCO pruner.

- Wear appropriate personal protective equipment, such as gardening gloves, to protect your hands.
- Ensure the pruner is clean and free of debris before and after handling.
- Keep the pruner and replacement parts out of reach of children and pets.
- Use the correct tools for installation to avoid damage to the handle or pruner.
- Do not force parts into place; if resistance is met, re-check alignment.

INSTALLATION INSTRUCTIONS

Replacing the handle grip on your FELCO 7 pruner is a straightforward process. Follow these steps carefully to ensure a secure and functional installation.

1. **Prepare the Pruner:** Ensure your FELCO 7 pruner is clean and free of dirt or sap. If replacing an old handle, carefully remove any screws or fasteners holding the old grip in place.
2. **Gather Tools:** You may need a screwdriver (appropriate size for your pruner's fasteners) and

possibly a small wrench, depending on your specific pruner model.

3. **Align the New Handle:** Position the new FELCO 7 replacement handle grip onto the pruner frame. Ensure that all holes for screws or fasteners align perfectly with the frame.
4. **Secure the Handle:** Insert the screws or fasteners through the aligned holes. Tighten them securely, but do not overtighten, as this could strip the threads or damage the handle material.
5. **Test the Grip:** Once installed, gently squeeze the pruner handles to ensure the new grip is firm and does not shift. Check for any wobbling or loose parts.

OPERATING THE FELCO 7 PRUNER (WITH NEW HANDLE)

With the new handle grip installed, your FELCO 7 pruner is ready for use. The replacement handle maintains the ergonomic design and functionality of the original, ensuring comfortable and effective pruning.

- **Proper Grip:** Hold the pruner firmly with the new rubber grip, ensuring your hand is positioned for maximum leverage and comfort.
- **Clean Cuts:** Always aim for clean, precise cuts. The new handle provides a stable base for accurate pruning.
- **Ergonomics:** The rubber grip is designed to reduce hand fatigue during extended use. Utilize the ergonomic design for comfortable operation.

MAINTENANCE

Regular maintenance of your FELCO 7 pruner and its new handle grip will extend its lifespan and ensure optimal performance.

- **Cleaning:** After each use, clean the handle grip with a damp cloth to remove dirt, sap, and debris. Avoid harsh chemicals that could degrade the rubber material.
- **Inspection:** Periodically inspect the handle for any signs of wear, cracks, or looseness. Ensure all fasteners remain tight.
- **Storage:** Store the pruner in a dry, clean place, away from direct sunlight and extreme temperatures, to preserve the integrity of the rubber grip.

TROUBLESHOOTING

If you encounter any issues with your FELCO 7 replacement handle, refer to the following common problems and solutions.

- **Handle feels loose:** Check the screws or fasteners holding the handle in place. Tighten them gently until secure. If the issue persists, inspect for stripped threads or damaged components.
- **Difficulty installing:** Ensure the handle is correctly aligned with the pruner frame. Do not force the handle; re-check the orientation and alignment of all parts.
- **Grip feels uncomfortable:** Verify that the handle is fully seated and secured. If discomfort persists, ensure you are using the pruner with proper technique and hand positioning.

SPECIFICATIONS

Feature	Detail
Brand	FELCO
Model Number	7/22B
Handle Material	Rubber
Item Weight	4.3 ounces
Product Dimensions (L x W x H)	8.66 x 3.54 x 1.57 inches
Special Feature	Easy to Install
