## 1. INTRODUCTION

Thank you for purchasing the Girmi SR02 Electric Citrus Juicer. This appliance is designed to provide fresh and natural juice quickly and efficiently. Its automatic pressure operation and dual interchangeable cones make it suitable for various citrus fruit sizes. The juicer is fully detachable for easy cleaning and features a 700 ml capacity with a transparent graduated container for precise juice measurement.

## 2. IMPORTANT SAFETY INSTRUCTIONS

- Read all instructions before using the appliance.
- Do not immerse the motor base, cord, or plug in water or other liquids.
- Close supervision is necessary when any appliance is used by or near children.
- Unplug from outlet when not in use, before putting on or taking off parts, and before cleaning.
- Avoid contact with moving parts.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner.
- The use of attachments not recommended or sold by the manufacturer may cause fire, electric shock, or injury.
- Do not use outdoors.
- Do not let cord hang over edge of table or counter or touch hot surfaces.

- Do not place on or near a hot gas or electric burner, or in a heated oven.
- Always ensure the appliance is properly assembled before operation.
- Do not use the appliance for anything other than its intended use.

### 3. PRODUCT COMPONENTS

---

The Girmi SR02 Electric Citrus Juicer consists of several detachable parts for easy assembly, use, and cleaning. Familiarize yourself with each component:

1. **Motor Base:** The main unit containing the motor and power cord.
2. **Juice Container (700ml):** Transparent container with measurement markings to collect the juice.
3. **Filter Grille:** Sits on top of the juice container to separate pulp and seeds from the juice.
4. **Small Pressing Cone:** For smaller citrus fruits like lemons and limes.
5. **Large Pressing Cone:** For larger citrus fruits like oranges and grapefruits.
6. **Dust Cover:** Protects the cones when the juicer is not in use.

## 4. SETUP AND ASSEMBLY

---

Before first use, wash all detachable parts (juice container, filter grille, pressing cones, dust cover) in warm, soapy water. Rinse thoroughly and dry. Do not wash the motor base in water.

1. Place the motor base on a stable, flat surface.
2. Position the juice container onto the motor base, ensuring it is securely seated.
3. Place the filter grille into the juice container.
4. Select the appropriate pressing cone (small for lemons/limes, large for oranges/grapefruits) and place it onto the rotating shaft on the filter grille.
5. The juicer is now assembled and ready for operation.

## 5. OPERATING INSTRUCTIONS

---

Follow these steps to extract fresh juice:

1. Ensure the juicer is correctly assembled and plugged into a suitable power outlet (230V).
2. Cut the citrus fruit (e.g., orange, lemon) in half.
3. Place one half of the fruit onto the pressing cone.
4. Apply gentle downward pressure on the fruit. The motor will automatically start rotating.
5. Continue pressing and rotating the fruit until all juice is extracted. The double rotation feature ensures maximum juice extraction.
6. Release pressure, and the motor will stop.
7. Repeat with the remaining fruit halves.
8. Once juicing is complete, lift the juice container from the motor base and pour the fresh juice into a glass.

## 6. CLEANING AND MAINTENANCE

Regular cleaning ensures optimal performance and extends the life of your juicer.

1. **Before Cleaning:** Always unplug the appliance from the power outlet before cleaning.
2. **Disassembly:** Carefully remove the dust cover, pressing cone, filter grille, and juice container from the motor base.
3. **Washing Detachable Parts:** Wash the juice container, filter grille, pressing cones, and dust cover in warm, soapy water. Rinse thoroughly under running water. These parts are also dishwasher safe.
4. **Cleaning the Motor Base:** Wipe the motor base with a damp cloth. Do not immerse the motor base in water or any other liquid.
5. **Drying:** Ensure all parts are completely dry before reassembling or storing the juicer.
6. **Storage:** Store the assembled juicer in a clean, dry place.

---

## 7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Juicer does not start.	Not plugged in; power outlet not working; appliance not assembled correctly.	Check power connection; try another outlet; ensure all parts are correctly assembled.
Motor stops during juicing.	Too much pressure applied; motor overheating.	Reduce pressure on the fruit; allow the motor to cool down for a few minutes before resuming.
Poor juice extraction.	Incorrect cone size used; insufficient pressure.	Use the appropriate cone for the fruit size; apply firm but gentle downward pressure.
Juice leaks from the base.	Juice container not properly seated.	Ensure the juice container is securely placed on the motor base.

## 8. TECHNICAL SPECIFICATIONS

---

**Brand:** Girmi

**Model Number:** SR0201

**Power:** 25 Watts

**Voltage:** 230V

**Capacity:** 700 ml

**Product Dimensions (L x W x H):** 20 x 20 x 14 cm

**Item Weight:** 570 g

**Special Feature:** Pulp control

**Material:** Plastic

**Recommended Uses:** Lemon, Orange

**Care Instructions:** Washable (detachable parts)

## 9. WARRANTY AND CUSTOMER SUPPORT

---

This Girmi SR02 Electric Citrus Juicer comes with a standard manufacturer's warranty. Please refer to the warranty card included in your product packaging for specific terms and conditions, including the warranty period and coverage details.
