1. Introduction

Thank you for choosing the Dragonhawk Extreme Rotary Tattoo Machine. This manual provides essential information for the safe and effective use, setup, operation, and maintenance of your new tattoo machine. Please read this manual thoroughly before use and retain it for future reference.

2. Product Overview

The Dragonhawk Extreme Rotary Tattoo Machine is engineered for precision and durability, suitable for various tattooing techniques. Its ergonomic design ensures comfort during extended use.

2.1 Key Features

- **Voltage Range:** Adjustable voltage between 7.5 - 9 volts, suitable for various tattooing techniques including color packing, shading, lining, and heavy black filling.
- **Design:** Ergonomic design for a virtually weightless feel, allowing for precision and ease during use.
- **Construction:** Made with carbon steel and built to last, providing durability and reliability for all tattooing needs.

2.2 Components

The machine consists of a carbon steel unibody, a strong steel spring mechanism, and a Japan motor, all designed for stable and consistent performance.

The Update

OILY SLIDER

Slider is oil resistant
Lower coefficient of friction and lower sound
Regardless of temperature
Machine performance will not be affected

STEEL SPRING

Strong steel spring
Better elasticity
Longer use
Strong steel springs make the machine more stable
and resilient

Figure 3: Close-up view of the machine's internal mechanism, highlighting the slider and spring components.

3. Setup

Proper setup is crucial for optimal performance and safety. Follow these steps to prepare your machine for use:

1. **Connect Power Supply:** Attach your clip cord to the machine's connection points and connect to a compatible tattoo power supply.
2. **Attach Grip and Needle/Cartridge:** Securely attach your preferred grip to the machine. Insert your chosen needle bar or cartridge into the grip.
3. **Adjust Needle Depth:** Adjust the needle depth by rotating the grip or the machine's adjustment knob, ensuring the needle protrudes to the desired length. It is recommended to run the machine briefly to observe the full stroke depth for accurate adjustment.

4. Operating Instructions

The Dragonhawk Extreme Rotary Tattoo Machine is versatile for various tattooing styles. Maintain a stable hand and observe the machine's performance for consistent results.

4.1 Recommended Voltage

The recommended operating voltage range is between 7.5 - 9 volts. This range provides optimal performance for different techniques. Adjust the voltage based on your specific needs for lining, shading, or color packing.

4.2 Tattooing Techniques

- **Lining:** The machine is designed to provide clean and precise lines.
- **Shading:** Achieve smooth transitions and consistent shading with controlled voltage and hand speed.
- **Color Packing:** Efficiently pack color into the skin due to the machine's stable and powerful motor.

Dragonhawk Extreme Rotary Tattoo Machine

Dragonhawk extreme rotary machine using direct drive motor,by design simple and smooth,both lining and shading. frequency stability, long-lasting stability low skin lesions,by adjusting the voltage to control the machine frequency, could easily control more style of tattoo creation please add lubricant to the tattoo machine regularly to ensure optimum performance.

Oily slider

Lower coefficient of friction and lower sound

Steel spring

Strong steel springs make the machine more stable and resilient

Running Stable and Smooth

This machine is a versatile rotary machine designed for a wide variety of work

Compatible with traditional tattoo needles and cartridges

5. Maintenance

Regular maintenance ensures the longevity and consistent performance of your tattoo machine.

5.1 Lubrication

Apply a small amount of lubricant to the moving parts, particularly the slider mechanism, to reduce friction and maintain smooth operation. Use the provided 'Super Lube' or a similar high-quality lubricant designed for tattoo machines.

5.2 Cleaning

After each use, thoroughly clean and sterilize all parts of the machine that come into contact with ink or bodily fluids. Follow standard hygiene protocols for tattoo equipment.

6. Troubleshooting

If you encounter issues with your machine, consider the following common problems and solutions:

- **Machine not running or inconsistent:** Check power supply connections, ensure the clip cord is securely attached, and verify the power supply is functioning correctly.
- **Excessive noise or vibration:** Apply lubricant to the slider and other moving parts. Ensure all components are securely fastened.
- **Machine getting hot during use:** While some warmth is normal, excessive heat may indicate prolonged use at high voltage or a need for lubrication. Consider reducing voltage or taking short breaks during long sessions.
- **Spring failure:** The machine comes with an extra spring. If the spring fails, replace it using the provided allen wrench.

7. Specifications

Item Model Number	jimadajiheiselongying
UPC	701385991470
Package Dimensions	6.5 x 5 x 2.1 inches
Item Weight	11.22 ounces
Construction Material	Carbon Steel
Voltage Range	7.5 - 9 volts (Adjustable)
Color	Black

8. Warranty & Support
