

Walker Tape WKR-BTY-C22-4-SPRAY

Walker Tape C-22 Adhesive Solvent 4 Oz Spray Instruction Manual

Model: WKR-BTY-C22-4-SPRAY

INTRODUCTION

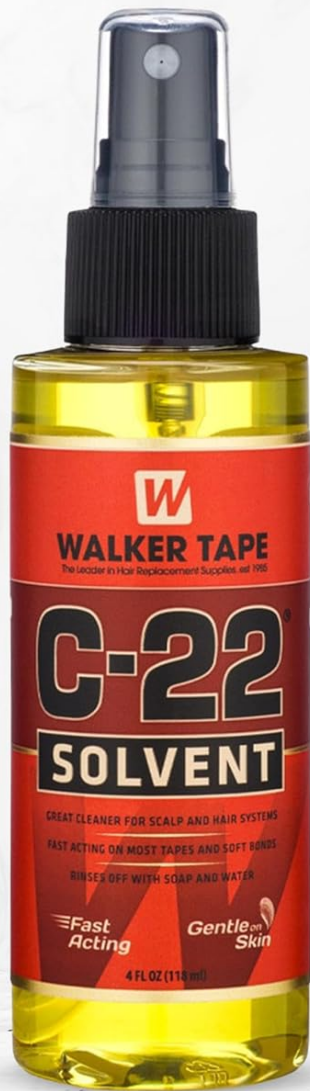

The Walker Tape C-22 Adhesive Solvent is an oil-based remover designed to quickly and easily break down hair adhesives. This product is formulated to simplify the removal process for hair extensions, wigs, and toupees, leaving a light citrus scent.

IMPORTANT SAFETY INFORMATION

WARNING: This product is intended for use by a Licensed Professional Cosmetologist or Barber. Always perform a small area patch test on the hair system. Apply to both the cap and a human hair strand. Leave on for 15 minutes. Examine the hair and cap for any possible damage. If results are satisfactory, proceed with the cleaning procedure. Pervana Corporation is not responsible for any damage to the hair system. It is strongly suggested to wear safety glasses during the cleaning process to protect eyes from product contact.

- **Flammable:** Keep away from heat and flame.
- Use in a well-ventilated area.
- Do not apply to broken or irritated skin.
- Avoid eye contact.
- Keep out of reach of children.
- Store in a cool, dry place, between 60-80°F (15-27°C).

SAFE USE & PROPER STORAGE

- Flammable — keep away from heat & flame
- Use in a well-ventilated area
- Do not apply to broken or irritated skin
- Avoid eye contact
- Keep out of reach of children
- Store cool, dry, 60–80°F

OPERATING INSTRUCTIONS: ADHESIVE REMOVAL

Follow these steps for effective and gentle adhesive removal:

1. **Preparation:** Ensure the area is well-ventilated. Have a comb or brush and a bond breaker shampoo ready.
2. **Apply Solvent:** Spray the C-22 Solvent directly onto the adhesive area of the hairpiece or extension. Ensure the adhesive is thoroughly saturated.
3. **Allow to Penetrate:** Let the solvent sit for approximately 1 minute to allow it to break down the adhesive. For stubborn bonds, you may need to let it sit slightly longer or reapply.
4. **Gentle Removal:** Once the adhesive begins to loosen, gently wipe or brush off the residue. Avoid harsh pulling or tugging to prevent damage to the hair system or natural hair.
5. **Cleanse:** After removing the hairpiece or extension, use a bond breaker shampoo to thoroughly cleanse any remaining solvent and adhesive residue from both the hair system and your natural hair. Rinse with soap and water.

EASY APPLICATION

1

Spray directly to adhesive area.

2

Allow solvent to break down adhesive.

3

Wipe or brush off residue gently.

4

Use Bond Breaker shampoo and rinse

Image: A visual guide showing four steps for easy application: spray directly to adhesive area, allow solvent to break down adhesive, wipe or brush off residue gently, and use bond breaker shampoo and rinse.

MAINTENANCE

Proper maintenance after using the C-22 Solvent is crucial to ensure the longevity of your hair system and the health of your natural hair.

- **Hair System Cleaning:** After removing the adhesive, thoroughly wash the hair system with a gentle shampoo and conditioner to remove all solvent and adhesive traces.
- **Natural Hair Care:** Wash your natural hair and scalp with a clarifying or bond breaker shampoo to ensure no residue remains. Follow with a moisturizing conditioner.
- **Storage:** Store your hair system properly in a clean, dry place away from direct sunlight and extreme temperatures.

TROUBLESHOOTING

- **Adhesive Not Loosening:** Ensure sufficient solvent has been applied and allowed adequate time to penetrate. For very strong or old adhesives, a second application or slightly longer waiting time may be necessary.
- **Residue Remaining:** After initial removal, if sticky residue persists, reapply a small amount of solvent to the affected area, gently rub, and then wash thoroughly with a bond breaker shampoo.
- **Skin Irritation:** If irritation occurs, discontinue use immediately and wash the affected area with soap and water. Consult a medical professional if irritation persists.
