Bajaj 410103

Bajaj Majesty Juicer One 500W Instruction Manual

Model: 410103 | Brand: Bajaj

1. Introduction

Thank you for purchasing the Bajaj Majesty Juicer One. This manual provides essential information for the safe and efficient operation, maintenance, and care of your new juicer. Please read all instructions carefully before first use and retain this manual for future reference.

The Bajaj Majesty Juicer One is designed to extract fresh juice from fruits and vegetables efficiently, featuring a powerful 500W motor and a convenient pulp collector.

2. Important Safety Instructions

When using electrical appliances, basic safety precautions should always be followed to reduce the risk of fire, electric shock, and injury to persons. Read all instructions carefully.

- Always ensure the juicer is properly assembled before operation.
- Do not operate the appliance with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner.
- Keep hands and utensils away from the moving blade during operation to prevent personal injury.
- Never push food with your fingers. Always use the food pusher provided.
- Unplug from outlet when not in use, before putting on or taking off parts, and before cleaning.
- Do not immerse the motor base in water or any other liquid.
- This appliance is for household use only. Do not use outdoors.
- Ensure the lid is securely locked in place before operating the juicer.

3. Product Overview and Components

Familiarize yourself with the parts of your Bajaj Majesty Juicer One:

- Motor Base (main unit with 500W motor)
- Pulp Collector
- Juicing Jar/Container
- Filter/Sieve with Stainless Steel Blade
- Lid with Feeding Tube
- Food Pusher

4. Setup and Assembly

Follow these steps to assemble your juicer before use:

1. Place the motor base on a stable, flat, and dry surface.
2. Insert the pulp collector onto the motor base, ensuring it fits securely.
3. Place the filter/sieve with the stainless steel blade assembly into the center of the pulp collector. Ensure it is seated firmly.
4. Position the juicing jar under the juice spout.
5. Place the lid onto the pulp collector, aligning the locking tabs.
6. Secure the lid by engaging the safety locking arms. The juicer will not operate unless the lid is correctly locked.
7. Plug the power cord into a suitable electrical outlet (220 Volts).

5. Operating Instructions

Prepare your fruits and vegetables:

- Wash all produce thoroughly.
- Peel fruits and vegetables that have thick or inedible skins (e.g., oranges, pineapples, melons).
- Remove large seeds or pits (e.g., from peaches, plums, cherries).
- Cut produce into pieces small enough to fit into the feeding tube.

To operate the juicer:

1. Ensure the juicer is properly assembled and the juicing jar is in place.
2. Turn on the juicer using the power switch. The juicer operates at a single speed.
3. Gradually feed the prepared fruits and vegetables into the feeding tube.
4. Use the food pusher to gently guide the produce down the feeding tube. Do not apply excessive force.
5. The fresh juice will flow into the juicing jar, and the pulp will collect in the pulp collector.
6. Once juicing is complete, turn off the juicer and unplug it from the power outlet.

6. Cleaning and Maintenance

Regular cleaning ensures optimal performance and extends the life of your juicer. The Bajaj Majesty Juicer One is designed for easy cleaning.

1. Always unplug the juicer before cleaning.
2. Disassemble the juicer by reversing the assembly steps.
3. Remove the pulp from the pulp collector.
4. Rinse all removable parts (pulp collector, juicing jar, filter/sieve, lid, food pusher) under running water immediately after use to prevent pulp from drying and sticking.
5. Most removable parts are dishwasher safe. For manual cleaning, use warm, soapy water and a non-abrasive brush or sponge. Pay special attention to the stainless steel blade/filter to ensure all pulp is removed.
6. Wipe the motor base with a damp cloth. Never immerse the motor base in water.
7. Dry all parts thoroughly before reassembling or storing.

7. Troubleshooting

If you encounter issues with your juicer, refer to the following common problems and solutions:

- **Juicer does not turn on:**
  - Check if the power cord is securely plugged into the outlet.
  - Ensure the lid is properly locked and the safety locking arms are engaged. The juicer has a safety interlock system.
- **Poor juice extraction or excessive pulp:**
  - Ensure the filter/sieve is clean and free from blockages.
  - Feed produce slowly and do not overload the feeding tube.
  - Ensure fruits and vegetables are cut into appropriate sizes.
- **Motor stops during operation:**
  - The juicer may have overheated. Turn off the appliance, unplug it, and allow it to cool down for at least 30 minutes before restarting.
  - Check for any blockages in the filter or feeding tube.

If the problem persists, please contact customer support.

8. Specifications

Feature	Specification
Brand	Bajaj
Model Number	410103
Maximum Power	500 Watts
Voltage	220 Volts

Number of Speeds	1
Material Type	ABS (Body), Stainless Steel (Blade)
Special Feature	Lightweight, Pulp Collector
Product Care Instructions	Dishwasher Safe (removable parts)
Item Weight	3.62 Kilograms

9. Warranty and Support

For warranty information, service, or support, please refer to the warranty card included with your product or contact Bajaj customer service directly. Keep your purchase receipt as proof of purchase for any warranty claims.

Contact information for Bajaj customer support can typically be found on the official Bajaj website or on the product packaging.
