MAINTENANCE

Proper maintenance will help extend the life of your ZINUS Smart Box Spring:

- **Cleaning:** Wipe the metal frame with a dry cloth as needed. The poly jacquard cover can be spot cleaned with a mild detergent and damp cloth. Do not machine wash or bleach the cover.
- **Inspection:** Periodically inspect all bolts and connections to ensure they remain tight. Re-tighten if necessary.
- **Environment:** Keep the box spring in a dry environment to prevent rust or damage to the metal components.

TROUBLESHOOTING

If you encounter any issues with your ZINUS Smart Box Spring, consider the following:

- **Squeaking Noises:** Ensure all frame connections are fully tightened. Loose bolts can cause squeaking.
- **Instability/Wobbling:** Verify that the box spring is placed on a stable and level bed frame. Check that all assembly steps

were completed correctly and all parts are securely fastened.

- **Mattress Sliding:** If your mattress slides on the box spring, ensure the box spring cover is properly fitted. Some bed frames may also contribute to mattress movement; consider using a non-slip pad between the mattress and the box spring if needed.
