Juscycling JUS01

Juscycling Presta to Schrader Valve Adapter Instruction Manual

Brand: Juscycling | **Model:** JUS01

Overview Installation Usage Maintenance Troubleshooting Specifications Support

1. Product Overview

The Juscycling Presta to Schrader Valve Adapter is a simple yet essential tool designed to convert a Presta valve on your bicycle tire into a Schrader valve. This allows you to inflate your Presta valve tires using standard Schrader-compatible pumps, such as conventional bike pumps or gas station air compressors. Made from durable brass, these adapters are reliable, lightweight, and resistant to corrosion, ensuring long-lasting performance.

Key Features:

- Converts Presta valves to Schrader valves for universal pump compatibility.
- Easy to install and can remain on the valve for convenience.
- Integrated rubber O-ring to prevent air leakage.
- High-precision threads for repeated use without affecting performance.
- Constructed from brass for reliability, lightweight design, and corrosion resistance.

2. Installation Instructions

Follow these simple steps to install the Presta to Schrader valve adapter on your bicycle tire:

1. **Remove Valve Cap:** If your Presta valve has a cap, unscrew and remove it.
2. **Unthread Valve Core:** Locate the small threaded tip at the top of the Presta valve. Unscrew this tip counter-clockwise until it is fully extended and air can be released. This opens the valve for inflation.
3. **Thread on Adapter:** Carefully thread the Juscycling Presta to Schrader valve adapter onto the exposed Presta valve stem. Turn it clockwise until it is securely tightened. You might hear a slight hiss of air as the adapter seats, which is normal. Ensure it is snug to prevent air leakage during inflation.
4. **Attach Pump:** Once the adapter is securely in place, you can attach any standard Schrader-compatible bike pump or air compressor to the adapter.

Figure 3: Step-by-step visual guide for installing the Presta to Schrader valve adapter.

For a visual demonstration, please watch the installation video below:

3. Operating Instructions

Once the adapter is installed, using it is straightforward:

1. **Inflate Tire:** Connect your Schrader-compatible pump to the adapter and inflate your tire to the recommended pressure.
2. **Remove Pump:** Once the desired pressure is reached, disconnect the pump from the adapter.
3. **Secure Valve Core (Important):** If you plan to leave the adapter on your bike, ensure the original Presta valve core is threaded back down tightly to prevent air loss. The adapter itself does not seal the Presta valve; the valve core must be closed.
4. **Optional: Leave Adapter On:** The adapter is designed to be left on the Presta valve for continuous convenience, eliminating the need to carry it separately.

Figure 4: The adapter can be left on the Presta valve for convenience. Remember to secure the Presta valve core.

4. Maintenance

The Juscycling Presta to Schrader Valve Adapter requires minimal maintenance due to its durable brass construction and integrated O-ring. To ensure optimal performance and longevity:

- **Keep Clean:** Periodically wipe the adapter clean with a damp cloth to remove dirt or grime.
- **Inspect O-Ring:** Occasionally check the rubber O-ring inside the adapter for any signs of wear or damage. A damaged O-ring can lead to air leakage. Replace if necessary.
- **Proper Storage:** If not left on the bike, store the adapters in a dry place to prevent accumulation of moisture or debris.

Figure 5: Detailed view of the adapter, highlighting the integrated O-ring for air sealing.

5. Troubleshooting

If you encounter issues while using your valve adapter, consider the following:

- **Air Leakage During Inflation:**
  - Ensure the adapter is threaded tightly onto the Presta valve stem.
  - Verify that the Presta valve core is fully unthreaded (open) before attaching the adapter.
  - Check the rubber O-ring inside the adapter's opening that might be damaged or displaced.
- **Difficulty Attaching Pump:**
  - Ensure you are using a Schrader-compatible pump head.
  - Check for any debris inside the adapter's opening that might obstruct the pump connection.
- **Air Loss After Inflation (Adapter Left On):**
  - Confirm that the original Presta valve core is threaded back down and tightened after inflation. The adapter converts the interface but does not replace the sealing function of the Presta valve core.

6. Product Specifications

Feature	Detail
Brand	Juscycling
Model Number	JUS01
Material	Brass
Color	Brass (5 Adapters)
Fit Type	Universal Fit (Presta to Schrader)
Vehicle Service Type	Bicycle
Number of Pieces	5
Item Weight	0.317 ounces (approx. 3.4 grams per adapter)
Package Dimensions	4.09 x 3.07 x 0.55 inches
UPC	716045697104
