Beghelli BEG4609

Beghelli BEG4609 LED Emergency Ceiling Light User Manual

Brand: Beghelli | **Model:** BEG4609

INTRODUCTION

This manual provides essential information for the proper installation, operation, and maintenance of your Beghelli BEG4609 LED Emergency Ceiling Light. This device is designed for emergency lighting and safety signaling, functioning as an autonomous LED emergency lighting fixture. Please read these instructions carefully before use and retain them for future reference.

Image 1: Beghelli BEG4609 LED Emergency Ceiling Light. This image displays the compact design of the emergency light, suitable for various indoor installations.

SETUP AND INSTALLATION

The Beghelli BEG4609 is designed for wall mounting and requires a wired electrical connection. Ensure all electrical work is performed by a qualified professional and complies with local electrical codes and regulations.

1. **Safety First:** Before beginning installation, ensure the main power supply to the installation area is switched off at the circuit breaker.
2. **Choose Location:** Select a suitable wall location for the emergency light, ensuring it provides adequate illumination for emergency exits or pathways.
3. **Mounting:** Securely attach the fixture to the wall using appropriate screws and anchors (not included). The fixture is constructed from polycarbonate, steel, and glass, providing durability.
4. **Electrical Connection:** Connect the electrical wiring to the fixture's terminals according to the wiring diagram provided with the product packaging. This device operates with a corded electric power source.

5. **Sealing:** The fixture has an IP65 rating, indicating protection against dust and low-pressure water jets. Ensure all connections and seals are properly secured to maintain this protection, especially if installed in environments where moisture or dust is present.
6. **Power On:** Once installation is complete and all connections are secure, restore power to the circuit. The emergency light should perform an initial self-test.

OPERATING INSTRUCTIONS

The Beghelli BEG4609 is an autonomous LED emergency light designed to activate automatically during a power outage. It does not require manual operation under normal circumstances.

- **Normal Operation:** When main power is present, the device typically remains in standby mode. The LED indicator (if present) will show the operational status.
- **Emergency Mode:** In the event of a power failure, the emergency light will automatically switch on, providing illumination from its LED light source.
- **Return to Normal:** Once main power is restored, the light will switch off (or return to standby mode) and prepare for the next emergency.

Note: This model is specified as not including batteries and not requiring them, which suggests it is designed to be connected to a central emergency power system or relies on the main power for its emergency function. Please refer to the specific wiring diagram and product documentation for clarification on its power source for emergency operation.

MAINTENANCE

Regular maintenance ensures the longevity and reliable operation of your Beghelli BEG4609 emergency light.

- **Cleaning:** Periodically clean the exterior of the fixture with a soft, damp cloth. Do not use abrasive cleaners or solvents, as these can damage the polycarbonate, steel, or glass surfaces.
- **Inspection:** Regularly inspect the fixture for any signs of damage, loose connections, or wear. Ensure the light output is clear and unobstructed.
- **Functionality Test:** It is recommended to periodically test the emergency function by temporarily cutting power to the circuit the light is connected to. The light should illuminate immediately. Restore power after a short test period.

TROUBLESHOOTING

If your Beghelli BEG4609 emergency light is not functioning as expected, consider the following common issues and solutions:

- **Light does not turn on during power outage:**
 - Check the main power supply to the circuit.
 - Verify all electrical connections to the fixture are secure.
 - If connected to a central emergency power system, ensure that system is operational.
- **Light remains on constantly:**
 - Ensure main power is consistently supplied to the fixture.
 - If the issue persists, there might be an internal fault; contact customer support.
- **Dim or flickering light:**
 - This could indicate an issue with the power supply or the LED module.
 - Ensure the fixture is receiving stable power.

For issues not resolved by these steps, or for complex electrical problems, consult a qualified electrician or contact Beghelli

customer support.

SPECIFICATIONS

Feature	Detail
Brand	Beghelli
Manufacturer	Beghelli
Product Dimensions	13 x 14 x 6 cm
Item Model Number	BEG4609
IP Rating	IP65
Number of Items	1
Style	Modern
Color	Multicolor (Product image and shade color indicate white/grey)
Material	Polycarbonate, Steel, Glass
Finish Types	Polished
Number of Lights	1
Specific Uses	Emergency
Special Features	Emergency lighting and safety signaling
Shade Color	White
Shade Material	Metal
Light Direction	LED
Power Source	Corded Electric
Switch Installation Type	Wall Mount
Batteries Included?	No
Batteries Required?	No
Bulb Type	LED
Bulb Base	G4
Energy Efficiency Class (EU)	A
Item Weight	200 g

WARRANTY AND SUPPORT

Specific warranty details for the Beghelli BEG4609 LED Emergency Ceiling Light are typically provided with the product packaging or can be obtained directly from the manufacturer or the point of purchase.

- Warranty Information:** Please refer to the documentation included with your product for the most accurate and up-to-date warranty terms and conditions.

- **Customer Support:** For technical assistance, troubleshooting beyond this manual, or warranty claims, please contact Beghelli customer service. Visit the official Beghelli website for contact information.

ASK A QUESTION ABOUT THIS MANUAL

Ask about setup, troubleshooting, compatibility, parts, safety, or missing instructions. Manuals+ will review the question and use this page's manual context to help answer it.
