Metaltex 2-in-1 Spatula and Probe Thermometer Instruction Manual

Model: 298064317

1. PRODUCT OVERVIEW

The Metaltex 2-in-1 Spatula and Probe Thermometer is a versatile kitchen tool designed for both stirring and accurately measuring food temperatures. It features a durable silicone spatula head and an integrated digital probe thermometer, making it ideal for various cooking tasks, from confectionery to roasting.

2. SETUP AND BATTERY INSTALLATION

Before first use, ensure the device is clean. The thermometer requires batteries for operation.

2.1 Battery Requirements

- Requires 2 x LR44 (1.5V) batteries (not included).

2.2 Installing Batteries

1. Locate the battery compartment on the handle of the thermometer.
2. Carefully open the compartment cover.
3. Insert two LR44 batteries, ensuring correct polarity (+/-).
4. Close the battery compartment cover securely.

Warning: Do not mix old and new batteries. Do not mix alkaline, standard (carbon-zinc), or rechargeable (nickel-cadmium) batteries.

3. OPERATING INSTRUCTIONS

This device offers dual functionality for cooking and temperature measurement.

3.1 Power On/Off

- Press the power button (usually located on the handle) to turn the thermometer on.
- Press and hold the power button to turn the thermometer off. The device may also feature an automatic shut-off function after a period of inactivity to conserve battery life.

3.2 Using as a Spatula

The silicone head is designed for stirring, scraping, and mixing ingredients in pots, pans, and bowls. Its flexible nature helps prevent scratching non-stick surfaces.

3.3 Using as a Probe Thermometer

To measure temperature, extend the probe from the spatula head. The large digital display will show the temperature reading.

1. Ensure the thermometer is powered on.
2. Carefully insert the metal probe into the food item you wish to measure. For liquids, ensure the probe tip is fully submerged but not touching the bottom or sides of the container. For solids like roasts, insert into the thickest part, avoiding bones.
3. Wait a few seconds for the temperature reading to stabilize on the digital display.
4. The device provides an extra precise measurement of +/-1°C.

Important: The thermometer is designed to measure temperatures up to 230°C. Do not expose the plastic handle or digital display directly to high heat or open flames. Do not immerse the entire handle in liquids.

4. MAINTENANCE AND CARE

Proper care will extend the life of your Metaltex 2-in-1 Spatula and Probe Thermometer.

4.1 Cleaning

- The silicone spatula head and metal probe can be washed with warm, soapy water.
- Wipe the plastic handle and digital display with a damp cloth.
- **Do not immerse the handle or digital display in water.**
- Ensure all parts are thoroughly dry before storage.

4.2 Storage

- Store the device in a clean, dry place away from direct sunlight and extreme temperatures.
- If storing for extended periods, it is recommended to remove the batteries to prevent leakage.

5. TROUBLESHOOTING

Problem	Possible Cause	Solution
Display does not turn on.	Batteries are dead or incorrectly installed.	Check battery polarity. Replace with new LR44 batteries.
Inaccurate temperature readings.	Probe not fully inserted or touching container. Low battery.	Ensure probe is inserted correctly into the center of the food. Replace batteries if low.
Device turns off unexpectedly.	Low battery. Automatic shut-off activated.	Replace batteries. The device has an automatic shut-off feature to save power.
