Homedics AF-15

Homedics TotalClean AF-15 Carbon Pre-Filter Replacement Manual

For Homedics TotalClean AP-15 Air Purifier

INTRODUCTION

This instruction manual provides essential information for the proper installation and maintenance of your Homedics TotalClean AF-15 Carbon Pre-Filter. This filter is specifically designed for use with the Homedics TotalClean AP-15 Air Purifier to ensure optimal performance in reducing household odors and capturing larger airborne particles.

PRODUCT OVERVIEW

The Homedics TotalClean AF-15 Carbon Pre-Filter is an integral component of your AP-15 Air Purifier's filtration system. It functions as the first line of defense, capturing larger particles such as dust, hair, lint, and dirt, while also utilizing activated carbon to reduce common household odors. This pre-filter helps extend the life of the main HEPA filter by preventing premature clogging.

AIR PURIFIER REPLACEMENT PREFILTER

Removes large particles and reduces household odors.

INSTALLATION

Follow these steps to correctly install or replace the AF-15 Carbon Pre-Filter in your Homedics TotalClean AP-15 Air Purifier:

1. Ensure the air purifier is turned off and unplugged from the power outlet before proceeding.
2. Locate the filter cover on your AP-15 Air Purifier. Refer to your air purifier's main instruction manual for specific details on opening the filter compartment.
3. Carefully remove the used pre-filter and main HEPA filter assembly.
4. Detach the old carbon pre-filter from the main HEPA filter.
5. Place the new AF-15 Carbon Pre-Filter onto the main HEPA filter, ensuring it fits securely.
6. Reinsert the filter assembly into the air purifier, making sure it is seated correctly.
7. Close the filter cover securely.
8. Plug the air purifier back into the power outlet.

REPLACE TWICE A YEAR

Install yourself every 6 months for optimal performance using the instructional guide featured in the "Getting Help Online" tab of the customer support page on our website.

OPERATING: FILTER RESET

After replacing the carbon pre-filter, it is important to reset the filter indicator on your Homedics TotalClean AP-15 Air Purifier. This ensures accurate tracking of filter life.

1. With the air purifier powered on, locate the filter reset button or indicator light on the control panel.
2. Press and hold the filter reset button for approximately 3-5 seconds until the indicator light resets or turns off. Refer to your AP-15 Air Purifier's manual for the exact location and procedure for the filter reset button.

MAINTENANCE

For optimal performance of your Homedics TotalClean AP-15 Air Purifier, the AF-15 Carbon Pre-Filter should be replaced regularly.

- **Replacement Schedule:** Replace the AF-15 Carbon Pre-Filter every 3 months under normal usage conditions. Increased usage or environments with higher levels of pollutants may require more frequent replacement.
- **Cleaning:** The carbon pre-filter is not washable and should not be cleaned. Attempting to clean it may damage the filter material and reduce its effectiveness.

TROUBLESHOOTING

If you experience issues after replacing your pre-filter, consider the following:

- **Persistent Odors:** Ensure the pre-filter is correctly installed and seated. If odors persist, the main HEPA filter may also need replacement, or the environment may have a continuous source of strong odors.
- **Filter Indicator Light Still On:** Confirm that you have performed the filter reset procedure as described in the 'Operating: Filter Reset' section. If the light remains on, consult your AP-15 Air Purifier's main manual or

Homedics customer support.

- **Reduced Airflow:** Check that the filter is not obstructed and is installed correctly. Ensure the air purifier's intake and output vents are clear.

SPECIFICATIONS

Feature	Detail
Model Number	AF-15
Compatible Air Purifier	Homedics TotalClean AP-15
Filter Type	Carbon Pre-Filter
Material	Carbon
Dimensions (approximate)	11.31 inches (L) x 10.88 inches (W) x 0.21 inches (Th)
