## Logitech 960-001178

# Logitech Brio 4K Pro Webcam User Manual

Model: 960-001178

Brand: Logitech

## INTRODUCTION

The Logitech Brio 4K Pro Webcam is designed to deliver exceptional video quality for streaming, recording, and video conferencing. Featuring Ultra HD 4K resolution, advanced autofocus, and a wide field of view, it provides a professional-grade visual experience. This manual provides instructions for setting up, operating, maintaining, and troubleshooting your Brio webcam.

## KEY FEATURES

- **Ultra HD 4K Resolution:** Capture video in stunning 4096 x 2160 resolution at 30 frames per second (fps), or 1080p at 60 fps, and 720p at 90 fps.
- **Autofocus:** Ensures sharp, clear images even when moving closer or further from the camera.
- **5X Digital Zoom:** Zoom in on details without losing clarity.
- **RightLight 3 with HDR:** Automatically adjusts exposure and contrast to compensate for glare and backlighting, ensuring you always look your best.
- **Multiple Fields of View:** Choose from 65°, 78°, or 90° diagonal fields of view to perfectly frame your video.
- **Infrared Face Recognition:** Supports Windows Hello for secure facial recognition login.
- **Dual Integrated Microphones:** Omnidirectional microphones with noise-canceling technology capture clear audio.
- **USB 3.0 Connectivity:** High-speed data transfer for smooth 4K video.

## PACKAGE CONTENTS

- Logitech Brio 4K Pro Webcam
- Detachable Universal Mounting Clip
- USB 3.0 Cable (compatible with USB 2.0)
- Privacy Shutter
- Carrying Pouch

## SETUP

### 1. Mounting the Webcam

The Brio webcam comes with a universal mounting clip that allows it to be securely placed on a monitor, laptop, or tripod.

1. **Attach the Clip:** Ensure the universal mounting clip is securely attached to the webcam.
2. **Position on Monitor:** Open the clip and place the webcam on top of your monitor or laptop screen. Adjust the flexible base to ensure it sits flush with the back of your device.
3. **Tripod Mounting:** The universal mounting clip also features a standard tripod thread. Remove the clip from the webcam and screw the webcam directly onto a tripod if preferred.

Image: Logitech Brio 4K Pro Webcam, rear view with monitor clip extended, showing the adjustable hinge for monitor placement.

## 2. Connecting to Your Computer

Connect the webcam to your computer using the provided USB cable.

1. Plug the USB-C end of the cable into the webcam.
2. Plug the USB-A end of the cable into an available USB 3.0 port on your computer for optimal performance. The webcam is also compatible with USB 2.0 ports.

The webcam is plug-and-play and should be automatically recognized by your operating system (Windows, macOS, Linux).

## OPERATING INSTRUCTIONS

### 1. Software Installation (Optional)

While the Brio webcam functions as a standard webcam without additional software, installing the Logitech Capture software (available from the Logitech website) unlocks advanced features and customization options, including:

- Adjusting field of view (65°, 78°, 90°)
- Customizing resolution and frame rate
- Enabling RightLight 3 with HDR
- Digital pan, tilt, and zoom controls
- Image adjustments (brightness, contrast, color intensity)

### 2. Using the Privacy Shutter

The included privacy shutter can be attached to the front of the webcam to physically block the lens when not in use, ensuring privacy.

### 3. Video Conferencing and Streaming

Once connected, select the Logitech Brio 4K Pro Webcam as your video and audio input device within your preferred video conferencing, streaming, or recording application.

**High performance, not  
affected by the light**

Image: The Logitech Brio 4K Pro Webcam positioned in a meeting room, illustrating its capability to maintain high performance regardless of ambient lighting.

## 4K HD Resolution, allows to show clearly

Image: The Logitech Brio 4K Pro Webcam displaying its 4K HD resolution during a video conference, ensuring clear visual communication.

### MAINTENANCE

- **Cleaning the Lens:** Use a soft, lint-free cloth specifically designed for optics to gently wipe the webcam lens. Avoid abrasive materials or harsh chemicals.
- **General Cleaning:** Wipe the body of the webcam with a soft, damp cloth. Do not immerse the webcam in water or use excessive moisture.
- **Storage:** When not in use, store the webcam in the provided carrying pouch to protect it from dust and scratches.

### TROUBLESHOOTING

- **Webcam Not Detected:**
  - Ensure the USB cable is securely connected to both the webcam and the computer.
  - Try connecting to a different USB port, preferably a USB 3.0 port.
  - Restart your computer.
  - Check your operating system's device manager to see if the webcam is listed.
- **Poor Video Quality:**

- Ensure adequate lighting in your environment.
- Clean the webcam lens.
- Verify that your application is set to the desired resolution and frame rate.
- Install Logitech Capture software for advanced image adjustments.

- **No Audio from Webcam Microphone:**

- Ensure the Logitech Brio microphone is selected as the input device in your application and operating system sound settings.
- Check microphone privacy settings in your operating system.

- **Autofocus Issues:**

- Ensure there is sufficient light.
- Avoid placing objects too close to the lens that might interfere with autofocus.
- If using Logitech Capture, ensure autofocus is enabled.

## SPECIFICATIONS

<b>Item Model Number</b>	960-001178
<b>Video Capture Resolution</b>	4K Ultra HD (4096 x 2160) at 30 fps, 1080p at 60 fps, 720p at 90 fps
