5.2 Battery Replacement

Replace batteries when the remote's response becomes sluggish or stops functioning. Always replace both batteries at the same time with new 1.5V AAA alkaline batteries. Do not mix old and new batteries, or different types of batteries. Dispose of used batteries according to local regulations.
If the remote will not be used for an extended period, remove the batteries to prevent leakage and potential damage to the remote.

- **Remote not responding:**
  - Ensure batteries are inserted correctly with proper polarity (+/-).
  - Replace old batteries with new 1.5V AAA batteries.
  - Check for any obstructions between the remote and the TV's infrared sensor.
  - Verify that the remote is pointed directly at the TV.
- **Some buttons not working:**
  - Clean the remote's surface, especially around the non-working buttons, to remove any dirt or debris that might be obstructing them.
  - Ensure the TV model is listed in the compatibility section. While this remote is a direct replacement, some specific TV functions might vary.
- **No programming needed:**
  - This remote is designed to work out of the box with compatible Insignia TV models. If it does not work after battery installation, double-check the TV model number against the compatibility list.
