## 4.2 Hair Preparation

- Ensure hair is clean, dry, and free of tangles.
- Apply a heat protectant spray evenly throughout your hair.
- Section your hair into manageable portions using clips.

## 4.3 Styling Techniques

The wide, multi-directional floating plates allow for various styling options:

- **Straightening:** Take a small section of hair and place it between the plates, close to the roots. Gently clamp the iron and glide it slowly down the hair shaft to the ends. Repeat until desired straightness is achieved.
- **Creating Waves/Curls:** For soft waves or curls, clamp a section of hair and rotate the iron 180 degrees as you glide it down the hair shaft. The rounded edges of the plates facilitate this motion.
