American Standard 8013A80GPC-020

American Standard Advanced Clean AC 1.0 SpaLet Bidet Seat

MODEL: 8013A80GPC-020

Introduction

This manual provides essential information for the proper installation, operation, and maintenance of your American Standard Advanced Clean AC 1.0 SpaLet Bidet Seat. Please read these instructions thoroughly before use to ensure safe and efficient operation and to maximize the lifespan of your product.

Figure 1: American Standard Advanced Clean AC 1.0 SpaLet Bidet Seat, closed view.

Features

The American Standard Advanced Clean AC 1.0 SpaLet Bidet Seat is designed to enhance personal hygiene with a range of adjustable features:

- **Dual Self-Cleaning Nozzles:** Two independent nozzles provide posterior and anterior cleansing, with five position adjustments for personalized comfort.
- **Adjustable Water Controls:** Five levels for water pressure and water temperature, including three preset and two customizable settings, along with a massage feature.
- **Heated Seat:** Three preset and two additional customizable temperature settings for the heated seat.
- **Deodorizer:** An integrated deodorizer with an active carbon filtration system helps maintain a fresh environment. The charcoal filter cartridge has an approximate lifespan of 10 years.
- **Slow-Close Seat and Lid:** Designed for gentle and quiet closing, preventing slamming.
- **One-Push Removable Seat:** Allows for easy detachment of the seat for thorough cleaning of both the seat and the toilet bowl.
- **One-Touch Power Save:** An 8-hour power-saving mode that temporarily stops seat and water heating

functions while maintaining cleansing and flushing capabilities.

- **Side Panel Operation:** All functions are controlled via an intuitive side panel.

Setup and Installation

Proper installation is crucial for the functionality and safety of your bidet seat. This bidet seat requires connection to an existing or newly installed electrical outlet to function. For detailed step-by-step installation instructions, please refer to the dedicated Installation Manual (PDF) provided with your product or available for download from the manufacturer's website.

Important Considerations:

- Ensure your toilet is compatible with the bidet seat. Refer to the measurement guide and compatibility chart.
- A Ground Fault Circuit Interrupter (GFCI) outlet is required for electrical connection.
- Professional installation is recommended for plumbing and electrical connections.

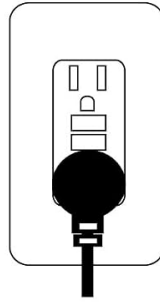

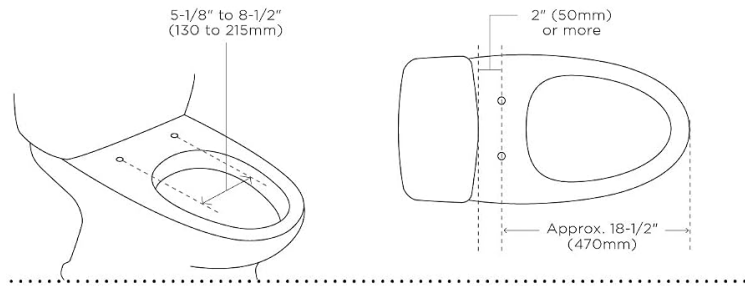

Measure For The Perfect Fit

Will the SpaLet Bidet Seats still fit even if my toilet isn't an American Standard toilet?

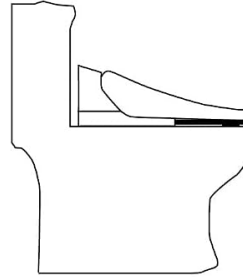

SpaLet Bidet Seats are designed to fit most elongated bowls.

But it's a smart idea to measure yours first to make sure it fits the model you choose. On a standard toilet with no curves between the seat and tank, all you need is 2 inches of room past the mounting bolts.

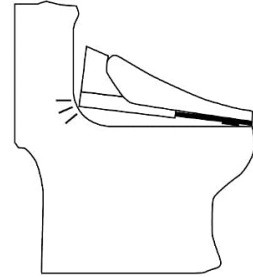

Use the following dimensions as a guideline.

GFI Outlet Required
(All except AquaWash 1.0 SpaLet Bidet Seat requires electricity)

✓ FITS
Standard toilet design

✗ MAY NOT FIT
Curved design between seat & tank

Required Dimensions

Elongated Toilet—Approximately 18-1/2 inches (470mm) from seat mounting holes to front of bowl

Minimum of 2 inches (50mm) from front of the tank to the center of the seat mounting holes

Approximately 5-1/8 inches (140mm)—8-1/2 inches (215mm) space in between the left and right seat mounting holes

Figure 4: Measurement guide for ensuring proper fit of the bidet seat on your toilet.

Operating Instructions

All functions of the SpaLet Bidet Seat are controlled via the side panel. Familiarize yourself with the control panel layout and button functions before use.

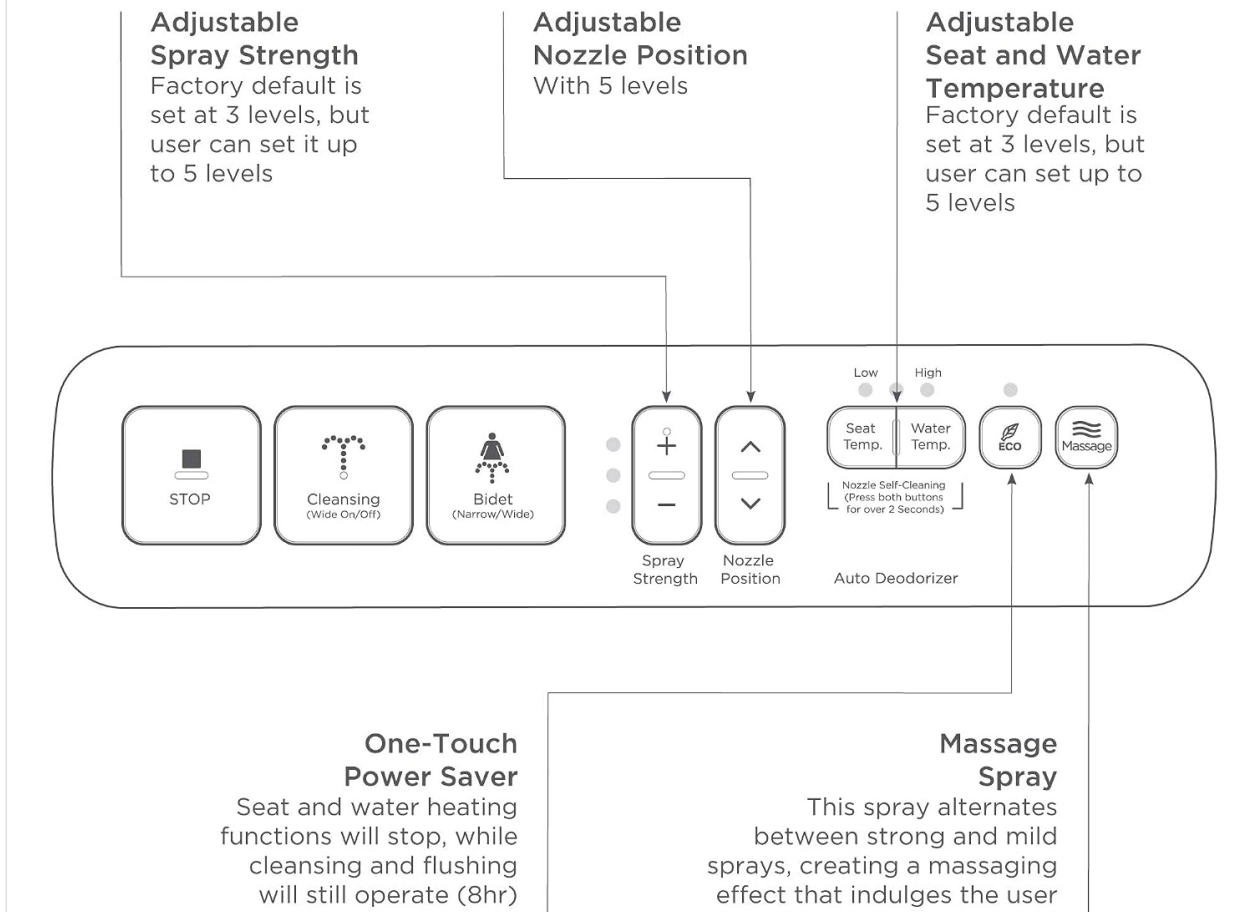

Figure 6: Control panel layout and function descriptions.

Figure 7: Detailed view of the side control panel.

Cleansing Functions:

- **Posterior Cleansing:** Press the 'Cleansing' button for rear washing. Adjust spray strength and nozzle position using the respective buttons.
- **Anterior (Feminine) Cleansing:** Press the 'Bidet' button for front washing. Adjust spray strength and nozzle position as needed.
- **Massage Function:** Activate the 'Massage' button during cleansing for an oscillating spray that alternates between strong and mild, providing a massaging effect.
- **Oscillating Cleansing:** The oscillating feature provides broader coverage without requiring a change in sitting position.
- **Stop:** Press the 'STOP' button to cease any active cleansing function.

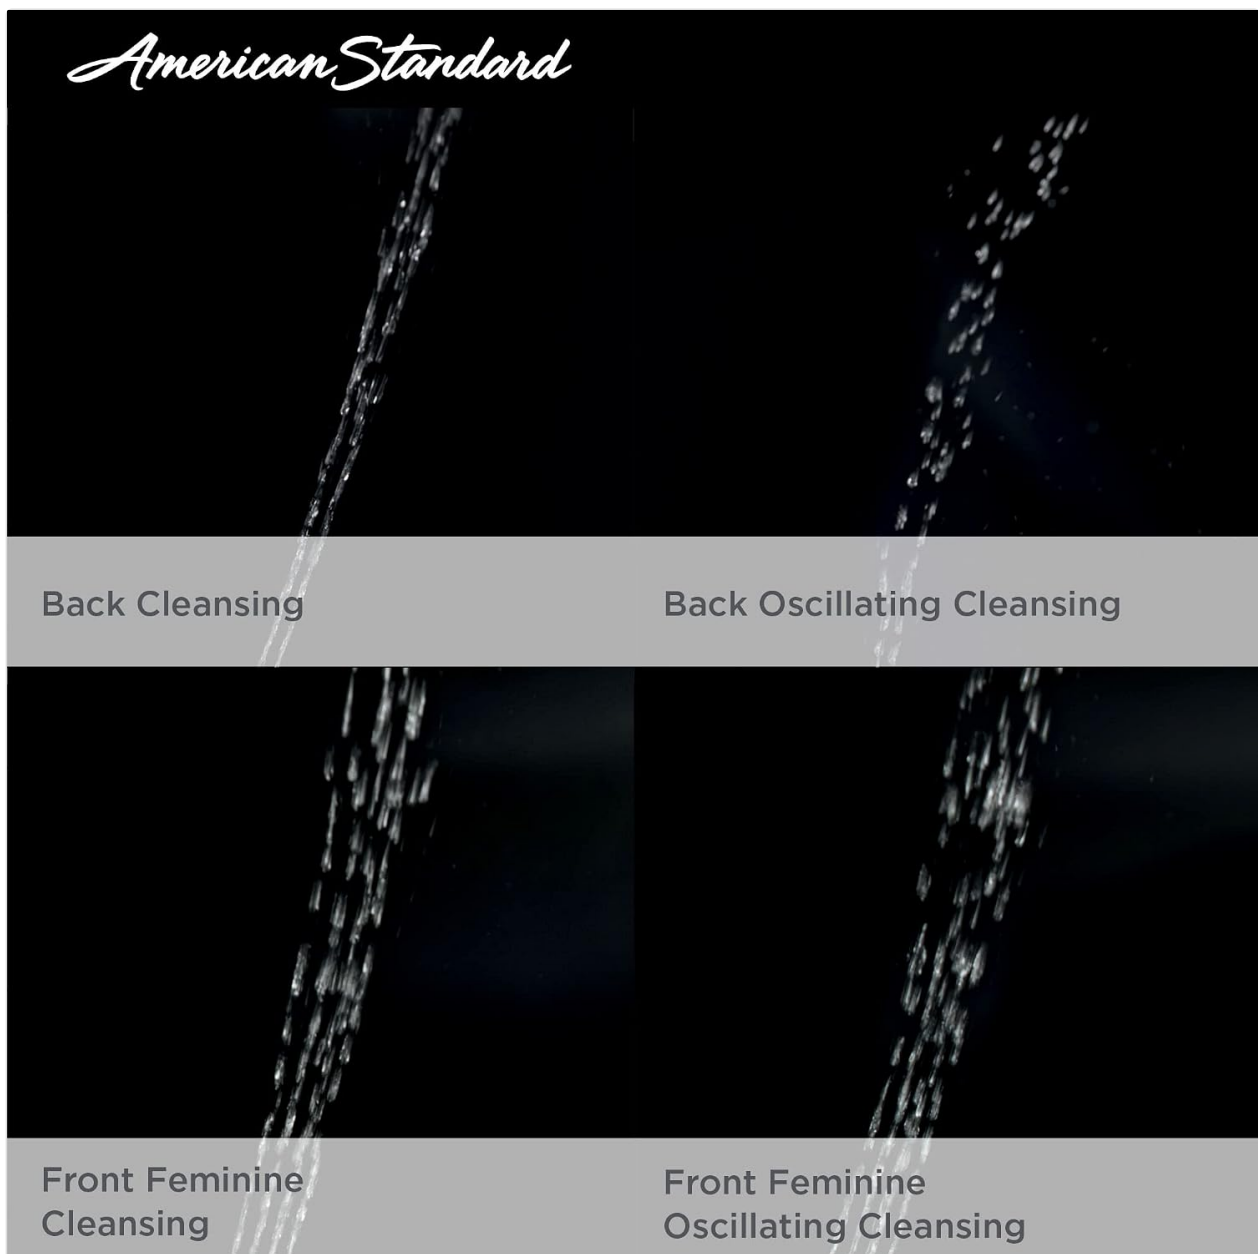

Figure 8: Various cleansing modes and spray patterns.

Temperature and Settings:

- **Water Temperature:** Use the 'Water Temp' buttons to cycle through five temperature levels.
- **Seat Temperature:** Use the 'Seat Temp' buttons to cycle through five heated seat temperature levels.
- **Eco Mode:** Activate the 'Eco' button for an 8-hour power-saving mode. This reduces energy consumption by temporarily turning off seat and water heating.

Maintenance

Regular cleaning and maintenance will ensure optimal performance and hygiene of your bidet seat.

Nozzle Cleaning:

- The bidet seat features self-cleaning nozzles that rinse before and after each use.
- For manual cleaning, press both 'Nozzle Self-Cleaning' buttons for over 2 seconds to extend the nozzles. Clean gently with a soft brush and mild soap.
- The nozzle shutter provides a clean environment by preventing waste material buildup.

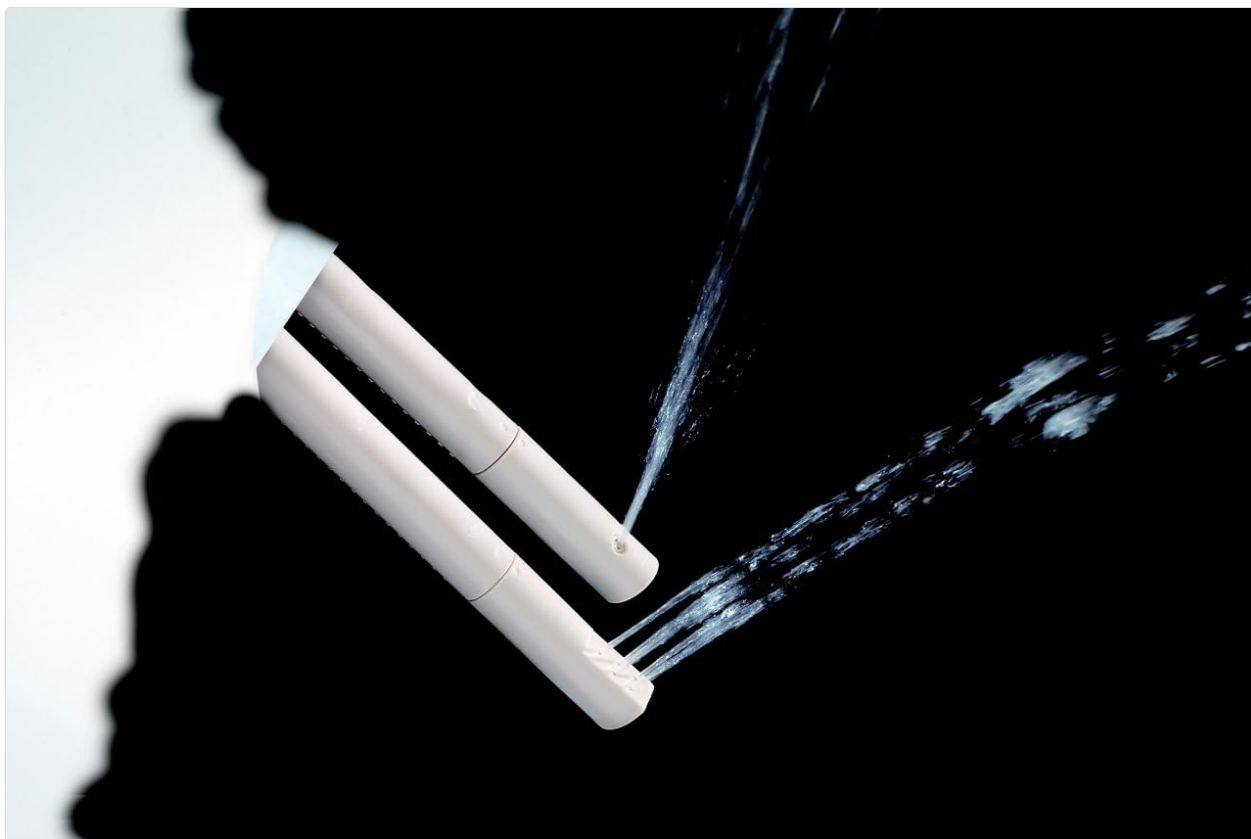

Figure 9: Dual self-cleaning nozzles in operation.

Seat and Bowl Cleaning:

- To clean the seat and surrounding bowl area, use the quick-release mechanism to detach the bidet seat.
- Press the quick-release button located on the side of the seat and slide the seat forward to remove it. This allows access to otherwise inaccessible areas for thorough cleaning.
- Clean the seat and toilet surfaces with a mild, non-abrasive cleaner. Avoid harsh chemicals that may damage the finish or internal components.
- The seat, cover, nozzles, and control panel are treated with properties to inhibit micro-particle growth.

Figure 10: Quick-release mechanism for easy seat removal and cleaning.

Troubleshooting

If you encounter any issues with your bidet seat, please review the following common troubleshooting tips. For more complex problems, contact customer support.

- **No Power:** Ensure the bidet seat is properly plugged into a functional GFCI outlet. Check the circuit breaker.
- **No Water Spray:** Verify the water supply valve is fully open. Check for any kinks in the water hose. Ensure the seat sensor is engaged (you must be seated for cleansing functions to activate).
- **Insufficient Water Pressure/Temperature:** Adjust settings using the control panel. Ensure the water heater is functioning correctly if applicable to your home's plumbing.
- **Nozzle Malfunction:** Perform a manual nozzle cleaning cycle. If issues persist, ensure no debris is obstructing the nozzles.
