Battery Care:

To prolong battery life, avoid fully discharging the battery frequently. Charge the headphones regularly, even if not in use for extended periods.

TROUBLESHOOTING

Headphones do not power on:

Ensure the headphones are fully charged. Connect to a power source and attempt to power on after a few minutes.

Ensure the headphones are in pairing mode (flashing red and blue LED). Make sure Bluetooth is enabled on your device and it is within range (typically 10 meters). Turn off and on both the headphones and the device, then try pairing again.

No sound or low volume:

Check the volume levels on both the headphones and your connected device. Ensure the headphones are properly paired and connected. Try re-pairing the headphones.

Poor sound quality:

Ensure there are no obstructions between the headphones and your device. Move closer to your device. Check for interference from other wireless devices.
