Ontel AHP-MC6/2

Ontel Air Hawk Pro Automatic Cordless Tire Inflator User Manual

Model: AHP-MC6/2

Brand: Ontel

Introduction

The Ontel Air Hawk Pro is a versatile automatic cordless tire inflator designed for convenient and efficient inflation of various items. It features an auto-stop function that allows you to set a desired pressure, preventing over-inflation. Its compact design ensures easy storage in a cabinet, car, or drawer, making it an ideal tool for on-the-go use or at home.

This image displays the Air Hawk Pro in action, highlighting its versatility for inflating car/SUV/RV tires, air mattresses, and inflatable toys. The main unit is shown with its flexible air hose connected, ready for use.

What's Included

Your Ontel Air Hawk Pro package includes the following components:

- Air Hawk Pro Unit
- Rechargeable battery
- 12V car adapter
- 11' cable adaptor
- 6' air hose
- 3 nozzles (for bike tires, sports equipment, inflatable balls, and other items)
- Carrying case
- Instruction manual
- Needle tip

Setup

Charging the Battery

Before initial use, ensure the 12V rechargeable battery is fully charged. Detach the battery from the main unit by pressing the release button. Connect the provided AC adapter to the battery and plug it into a standard wall outlet. The charging indicator light will show the charging status. A full charge is recommended for optimal performance.

Side view of the Ontel Air Hawk Pro, showing its compact design and the detachable 12V battery pack.

Attaching the Air Hose

Securely screw the flexible 6-foot air hose onto the inflation port at the front of the Air Hawk Pro unit. Ensure a tight seal to prevent air leakage during operation.

Operating Instructions

Setting Desired Pressure

1. Press the power button located at the back of the unit to turn on the digital display.
2. Use the '+' and '-' buttons to adjust the desired pressure (PSI) on the digital gauge. The unit will automatically shut off once this pressure is reached.

A detailed view of the digital pressure gauge on the Air Hawk Pro, showing the clear LED display and the intuitive plus and minus buttons for setting the desired pressure.

Inflating Tires

1. Attach the threaded connector of the air hose firmly to the tire valve stem.
2. Set your desired PSI using the digital gauge.
3. Squeeze and release the locking trigger to begin inflation. The unit will automatically stop when the set pressure is achieved.

The Air Hawk Pro is shown being used to inflate a car tire, demonstrating its cordless operation and ease of use for vehicle maintenance.

Inflating Other Items

For sports equipment, inflatable balls, or air mattresses, select the appropriate nozzle from the included attachments. Securely attach the nozzle to the air hose, then insert it into the item's inflation port. Follow the same steps for setting pressure and initiating inflation.

The Air Hawk Pro is depicted inflating a basketball, illustrating the use of the included needle attachment for sports equipment.

This image shows the Air Hawk Pro inflating an air mattress, demonstrating its capability to inflate larger items using the appropriate nozzle.

Using the LED Light

The Air Hawk Pro features a built-in LED light, useful for illuminating your work area in low-light conditions. Activate the light by pressing the dedicated light button on the unit.

Maintenance

- **Cleaning:** Wipe the unit with a damp cloth to remove dirt and debris. Do not immerse the unit in water.
- **Storage:** Store the Air Hawk Pro in its carrying case in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** For prolonged battery life, fully charge the battery before storing for extended periods and recharge periodically if not in use.

Troubleshooting

If you encounter issues with your Ontel Air Hawk Pro, consider the following general troubleshooting steps:

- **Unit not turning on:** Ensure the battery is fully charged and properly seated in the unit.
- **Inflation is slow or not reaching desired pressure:** Check for proper connection of the air hose to the unit and the item being inflated. Ensure there are no leaks in the hose or connections. Verify the battery has sufficient charge.
- **Inaccurate pressure reading:** Ensure the hose is securely attached and the valve stem is clean. Compare the reading with a separate, calibrated pressure gauge if available.

For persistent issues, refer to the detailed user manual or contact customer support.

Product Specifications

Feature	Specification
Brand	Ontel
Model Name	AHP-MC6/2
Power Source	Battery Powered
Voltage	12 Volts
Noise Level	84 dB
Item Weight	2.9 Pounds
Product Dimensions	11.5"L x 9"W x 4"H
Special Features	Cordless, Automatic Shut-Off, LED Light, Quick Inflation, AC & DC Adaptable

Warranty and Support
