## Moen 82604

# Moen Adler Chrome One-Handle Tub & Shower Faucet Multi-Function Showerhead

MODEL: 82604

## Introduction

This manual provides detailed instructions for the installation, operation, and maintenance of your Moen Adler Chrome One-Handle Tub & Shower Faucet with Multi-Function Showerhead, Model 82604. The Adler collection features smooth curves and minimalist aesthetics, designed to complement various bathroom décors. Please read all instructions carefully before proceeding with installation or use.

## Setup & Installation

For optimal results and to ensure proper functionality, professional installation by a licensed plumber is recommended for your shower valve and trim. This trim kit includes the Posi-Temp valve, trim, and showerhead necessary for a complete installation.

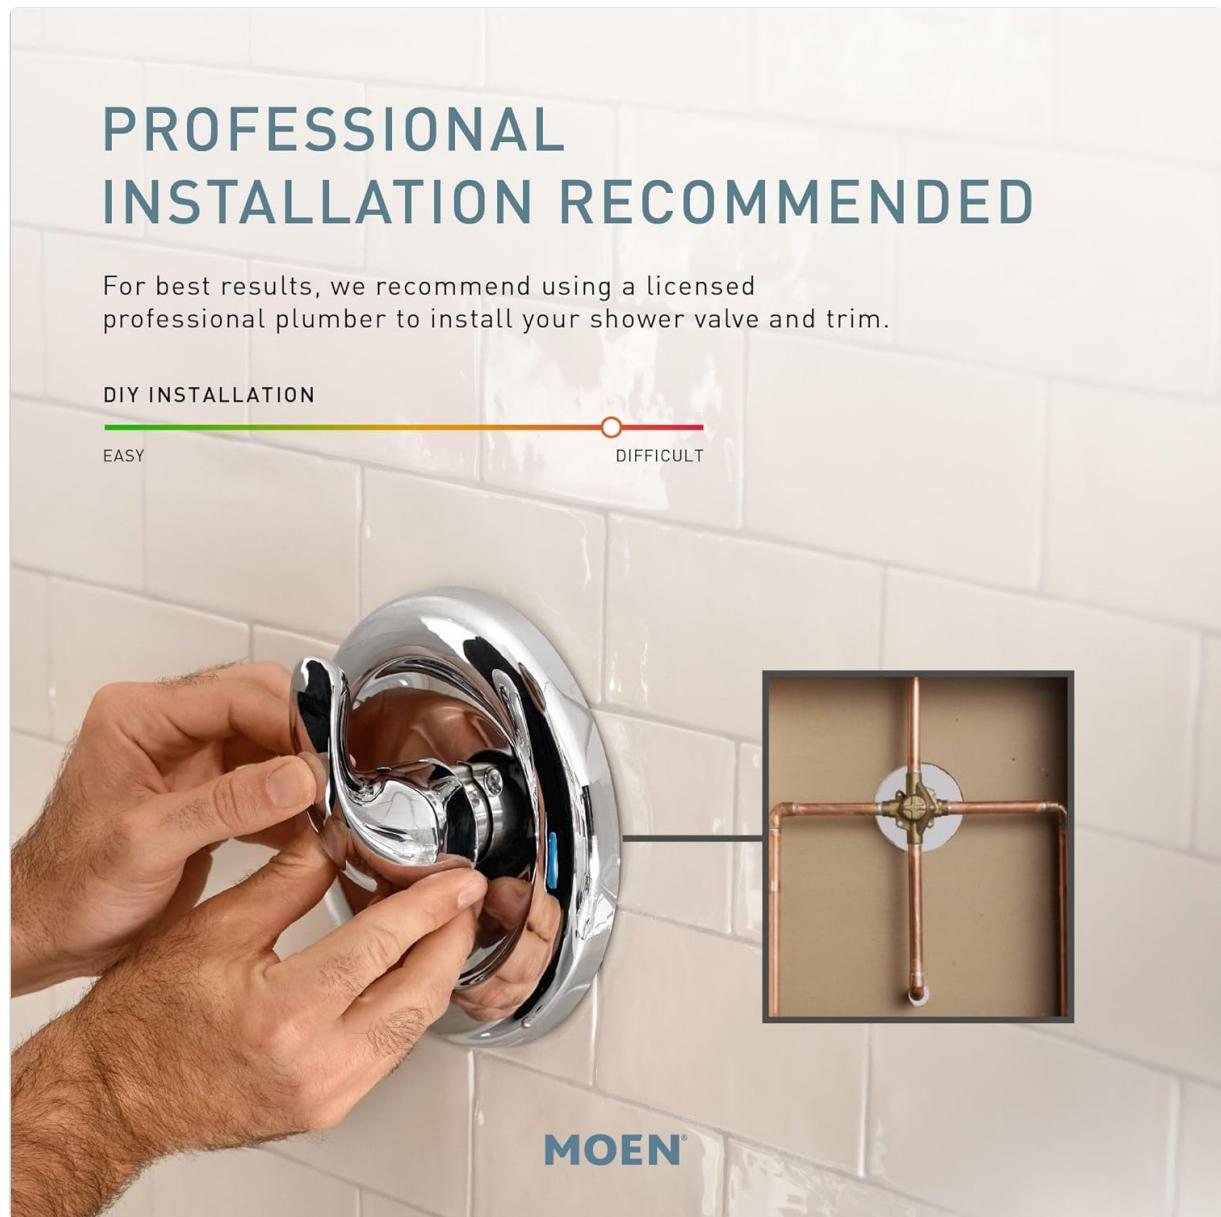

**Image: Professional Installation Recommended.** This diagram illustrates the complexity of installing a shower valve and trim, recommending professional assistance for best results.

Ensure all local plumbing codes are followed during installation. The Posi-Temp valve is designed to

maintain water temperature within a safe range, preventing sudden temperature changes.

## Operating Instructions

The Moen Adler faucet features a single handle for easy control of both water temperature and flow. The multi-function showerhead offers various spray settings for a personalized shower experience.

**Image: Moen Adler Faucet in use.** This image shows the Moen Adler tub and shower faucet with its multi-function showerhead providing a steady stream of water.

- **Temperature Control:** Rotate the single handle to adjust the water temperature. Typically, rotating counter-clockwise increases hot water, and clockwise increases cold water.
- **Flow Control:** Pull the handle outwards to turn on the water and push it inwards to turn it off.
- **Showerhead Function:** The multi-function showerhead allows you to switch between different spray patterns. Refer to the showerhead's specific instructions for changing spray settings.

# PROFESSIONAL INSTALLATION RECOMMENDED

For best results, we recommend using a licensed professional plumber to install your shower valve and trim.

## DIY INSTALLATION

EASY  DIFFICULT

**Image: Close-up of Faucet Handle.** This close-up view highlights the single lever handle for easy temperature and flow adjustment, with red and blue indicators for hot and cold.

## Maintenance

Regular cleaning and maintenance will ensure the longevity and optimal performance of your Moen Adler faucet.

- **Cleaning the Finish:** The chrome finish is highly reflective. Clean with a soft, damp cloth and mild soap. Avoid abrasive cleaners, scouring pads, or chemicals that could damage the finish.
- **Self-Cleaning Nozzles:** The showerhead features self-cleaning nozzles. Periodically rub the rubber nozzles to dislodge mineral buildup and maintain consistent spray performance.
- **Valve Maintenance:** If you experience issues with water flow or temperature control, the Posi-Temp valve cartridge may need inspection or replacement. Consult a professional plumber for assistance.

## Troubleshooting

If you encounter any issues with your Moen Adler faucet, consider the following common troubleshooting steps:

- **Low Water Flow:** Check if the main water supply is fully open. Ensure the showerhead nozzles are clear of mineral buildup (refer to Maintenance section).
- **Inconsistent Water Temperature:** Verify that the hot and cold water supply lines are correctly connected. If the issue persists, the Posi-Temp valve cartridge might require servicing or replacement by a qualified plumber.
- **Leaks:** Inspect all connections for tightness. If leaks originate from the handle or spout, the internal cartridge or seals may need replacement.

For complex issues or if troubleshooting steps do not resolve the problem, it is recommended to contact Moen customer support or a certified plumber.

## Specifications

Feature	Specification
Brand	Moen
Model Number	82604
Color	Chrome
Material	Plastic, Brass
Finish Type	Chrome
Number of Handles	1
Mounting Type	Wall Mount
Included Components	Valve, Trim, Showerhead
Flow Rate	1.75 Gallons Per Minute
Product Dimensions	10.16 x 8.11 x 5.43 inches

## Warranty Information
