Armitron 40/8309BLK

Armitron Sport Men's Digital Chronograph Resin Strap Watch Instruction Manual

Model: 40/8309BLK | Brand: Armitron

PRODUCT OVERVIEW

The Armitron Sport Men's Digital Chronograph Resin Strap Watch, model 40/8309BLK, features a quartz movement with a multifunctional digital display. Designed for durability and functionality, this watch is suitable for various activities.

Key Features:

- Black resin case and top ring with a 52mm case diameter.
- LCD display showing time, seconds, day, and date.
- Integrated functions include chronograph, lap time, alarm, dual time, military time, and backlight.
- Durable black resin strap with a secure buckle closure.
- Water resistant up to 330 feet (100 meters).

SETUP

This watch comes with a pre-installed lithium metal battery. Initial setup primarily involves setting the time, date, and configuring desired functions.

Setting Time and Date:

1. Press the **MODE** button repeatedly until the time setting mode is displayed.
2. Use the **RESET** button to select the digit or setting you wish to adjust (e.g., hours, minutes, year, month, day).
3. Use the **ST/STP** button to increase the selected value.
4. Once all settings are correct, press the **MODE** button to exit the setting mode.

Initial Battery Information:

The watch requires 1 Lithium Metal battery (included). For optimal performance, ensure the battery is properly seated upon first use. The battery is designed for long-term use, but replacement will eventually be necessary.

OPERATING INSTRUCTIONS

The Armitron Sport watch offers multiple functions accessible via its side buttons. Familiarize yourself with the button layout and their corresponding actions.

Function Modes:

Press the **MODE** button to cycle through the following functions:

- **Time Display:** Shows current time, day, and date.
- **Chronograph (Stopwatch):**
 - a. Press **MODE** until "CHRONO" or similar indicator appears.
 - b. Press **ST/STP** to start/stop the timer.
 - c. Press **RESET** to reset the timer to zero.
 - d. For lap time, press **RESET** while the chronograph is running to record a lap, then press again to resume.
- **Alarm:**
 - a. Press **MODE** until "ALARM" is displayed.
 - b. Use **RESET** and **ST/STP** to set the alarm time.
 - c. Press **MODE** to confirm and activate the alarm.
- **Dual Time:** Allows setting and viewing a second time zone.
 - a. Press **MODE** until "DUAL TIME" is displayed.
 - b. Use **RESET** and **ST/STP** to set the second time zone.
 - c. Press **MODE** to confirm.
- **Military Time:** The watch supports both 12-hour and 24-hour (military) time formats. This setting can typically be toggled within the time setting mode.

Backlight Function:

To illuminate the display in low-light conditions, press the **EL** (Electroluminescent) button. The backlight will typically remain on for a few seconds.

MAINTENANCE

Water Resistance:

The watch is water resistant to 330 feet (100M). This means it is suitable for swimming and snorkeling, but not for scuba diving. Avoid operating buttons while the watch is submerged to prevent water ingress.

This chart illustrates common water resistance ratings for watches. The Armitron Sport watch is rated for 100M (330FT).

Battery Replacement:

When the display fades or stops functioning, the battery may need replacement. The watch features a screw-down back case for battery access. It is recommended to have battery replacement performed by a qualified watch technician to ensure water resistance is maintained.

Cleaning:

Clean the watch case and strap with a soft, damp cloth. Avoid using harsh chemicals or abrasive materials, which can damage the resin and display.

TROUBLESHOOTING

- **Display is blank or dim:** This typically indicates a low battery. Refer to the "Battery Replacement" section.
- **Buttons are unresponsive:** Ensure the watch is not in a locked mode (if applicable, consult specific model instructions if this feature exists). If unresponsive, a battery issue or internal malfunction may be present.
- **Time is inaccurate:** Re-set the time following the "Setting Time and Date" instructions. If inaccuracy persists, the battery may be weak or the quartz movement may require servicing.
- **Condensation under crystal:** This indicates a breach in water resistance. Immediately cease water exposure and seek professional servicing to prevent further damage.

SPECIFICATIONS

Attribute	Detail
Model Number	40/8309BLK
Brand	Armitron
Movement	Quartz
Display Type	Digital
Case Material	Resin
Case Diameter	52mm
Strap Material	Resin
Water Resistance	100M (330 Feet)
